

Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
(Autonomous Institute Affiliated to University of Mumbai)

Bachelor of Engineering/Technology (B.E./B.Tech)
in
Computer Engineering

Third Year Engineering
(Sem. V and Sem. VI)
Effective from Academic Year 2017 -18

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

Preamble:

Concept of academic autonomy is based on the argument that Institutions can undertake the work expected of them by all stakeholders such as Students , Parents , University , Industry , Society in general, only if they have freedom of choice and action. We at S.P.I.T. would like to believe that this freedom of choice and action as far as academics is concerned will make us more Proactive in our offerings.

An academic autonomy is as good as its Curricula and execution of it is as well as its faculty. S.P.I.T. is confident of succeeding on both the fronts.

In the first offering we have tried to pro-actively bridge the ever discussed “Industry-academic gap” by way of our SCOPE program. The issue about sensitizing students to social needs is being addressed by special activity based courses. Liberal arts courses have been introduced to enhance functionality of both sides of brain. In all this the professional core has not been overlooked. Thus the curricula are designed to achieve multi dimensional outcomes.

The evaluation mechanism is tuned for assessing the attainment of the designed outcomes and is designed as a fair mechanism.

As our learning cycle begins from July 2017, I wish to place on record that entire S.P.I.T. staff and faculty will work with singular focus and commitment towards the success of this endeavour.

Dr. Prachi Gharpure
Principal, S.P.I.T.

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

From the Desk of Dean Academics

Greetings and congratulations to all the students, teaching and supporting staff of Sardar Patel Institute of Technology for getting autonomous status to the institute from the year 2017-18. We look towards autonomy as a great opportunity to design and implement curriculum sensitive to needs of Indian Society and Industries.

In the proposed curriculum we have made an attempt to provide opportunity for students to develop themselves as competent engineering graduates with knowledge, skill and ethical behavior required for global career. Curriculum is designed to provide multiple learning opportunities for students to acquire and demonstrate competencies for rewarding careers. The curriculum model is outcome based that focuses on learning by doing. This is achieved through activity based learning, minor projects, problem solving and innovative styles of pedagogy. Various steps are taken to transform teaching-learning process to make learning a joyful experience for students. Special laboratory based courses are introduced to give more practical exposure to the students.

To create socially responsible citizen curriculum offers courses like Constitution of India, Environmental Studies and Human Health Systems Approach. Also various activity based learning modules like 'Building Automation, Fire Safety and Electronic Security', 'Occupational Safety & Legal Studies for Engineers', 'Technical Presentation Skills', 'Technical Paper and Patent Drafting', 'Engineering Solution for Environmental Problems' and 'Financial Planning, Taxation Policies and Investment' are introduced. For overall development of the learner, various elective courses like Yoga Vidya, Music Appreciation, Dramatics, Industrial and Organizational Psychology, Law for Engineers, French Language, German Language etc. are introduced. To encourage interdisciplinary studies institute level Open Elective courses are offered.

One of the special feature of this curriculum is Skill development programme called SCOPE (Skill Certification for Outcome-Based Professional Education) planned to enhance employability, innovation and research culture in the institute. Every department is offering six domain specific tracks, each track containing six courses. Student will have an opportunity to enroll for more than 140 courses in any of the department of his choice. Some of the courses under SCOPE will be delivered in co-ordination with industries.

We believe that this curriculum will raise the bar of academic standards with the active involvement and cooperation from students, academic and administrative units. Faculty of S.P.I.T. deserves a special appreciation for their relentless efforts in designing curriculum and assessment instruments which will bring transformation in the quality and transparency in assessment of learners.

Looking forward for your active cooperation and constructive feedback to create vibrant and joyful learning environment at Sardar Patel Institute of Technology.

Dr. Surendra Singh Rathod
Professor and Dean Academics

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

Message from Head of the Department

The Computer Engineering is organized and administrated in accordance to industry to provide a professional atmosphere for students to enrich the discipline of computer. In particular, we aim, to produce highly qualified and all round graduates not only possessing fundamental knowledge of computing and technology but also to provide leadership and service to the community. The objective of the syllabus is to train students for reading, innovative thinking, and presentation habits. The Department is offering a well-balanced undergraduate computer engineering program designed considering technological, scientific, and humanistic study. B.Tech. programme is a 180-credit degree programme, which is spread over 8 semesters for a full-time student.

The syllabus is directional in wide scope and allows the much desired flexibility to keep speed with the ever growing body of knowledge and explorations in ICT enabled industries considering human side of enterprise. The course structures are carefully designed so that students get superiority in dealing with diverse situations when they step into the corporate world. The Skill Certification for Outcome-based Professional Education (SCOPE) Courses which are framed with respect to Industry expectations in mind surely helps students to develop their skills required.

Sardar Patel Institute of Technology's has taken a lead in incorporating philosophy of Choice Based Education in the process of curriculum development. This program subscribes to the view that a bachelor degree can be used as a stepping stone for master degree and research as well. We give you best wishes to take this syllabus and travel the path of success.

Dr. D. R. Kalbande
Head of Computer Engineering Department

Pre-requisite Course Codes	-
-----------------------------------	---

At end of successful completion of this course, student will be able to

Course Outcomes	CO1	Create assembly language and mixed language programs for 8086 based system.
	CO2	Design system using memory chips and peripheral chips for 8086 microprocessor.
	CO3	Illustrate techniques to improve performance of microprocessors.
	CO4	Distinguish between RISC and CISC.

Module No.	Topics	Ref.	Hrs.
1	Intel 8086/8088 Architecture 8086/8088 Microprocessor Architecture, Pin Configuration, Programming Model, Memory Segmentation, Study of 8284 Clock Generator, Operating Modes, Study of 8288 Bus Controller, Timing diagrams for Read and Write operations, Interrupts.	1-13	10
2	Instruction Set and Programming Instruction Set of 8086, Addressing Modes, Assembly Language Programming, Mixed Language Programming with C Language and Assembly Language.	1-13	8
3	System designing with 8086 Memory Interfacing: SRAM, ROM and DRAM (using DRAM Controller-Intel 8203). Applications of the Peripheral Controllers namely 8255-PPI, 8253-PIT, 8259-PIC and 8237-DMAC. Interfacing of the above Peripheral Controllers with 8086 microprocessor. 3.3 Introduction to 8087 Math Coprocessor and 8089 I/O Processor.	1-13	12
4	Intel 80386DX Processor	1-13	6

Sardar Patel Institute of Technology

CPCL502	Operating System Lab	--	--	2	--	--	1	1
		Examination Scheme						
		ISE		ESE			Total	
				Practical	Oral			
40	20	-		60				

Pre-requisite Course Codes	CPC502(Operating System)
-----------------------------------	--------------------------

At end of successful completion of this course, student will be able to

Course Outcomes	CO1	Compare performance of various CPU scheduling algorithm.
	CO2	Demonstrate deadlock detection and avoidance algorithm.
	CO3	Create processes and implement IPC
	CO4	Demonstrate file and memory allocation strategies.
	CO5	Demonstrate process synchronization.
	CO6	Develop mini project

Exp. No.	Experiment Details	Ref.	Marks
1	Implement CPU scheduling algorithm.	1,2	5
2	Implement Producer consumer problem using Semaphore.	1,2,3	5
3	Implement bankers algorithm for deadlock avoidance.	1,2	5
4	Implement threading and synchronization application.	1,2,3	5
5	Implement system calls for mv,cp.	4,5	5
6	Implement disk scheduling algorithm	1,2	5
7	BIOS CMOS and BOOT process : Study BIOS setting security	4,5	5
8	Develop Mini Project	1,2,3	5
Total Marks			40

CPCL504	Computer Networks Lab	--	--	2	--	--	1	1	
		Examination Scheme							Total
		ISE		ESE		-			
		40		20			-		60

Pre-requisite Course Codes	CPC504 (Computer Networks)		
At end of successful completion of this course, student will be able to			
Course Outcomes	CO1	Acquire the ns2 to simulate the network protocols.	
	CO2	Use appropriate network tools to build network topologies	
	CO3	Test simple protocols in a laboratory scenario.	
	CO4	Implement Application layer network protocols.	

Exp. No.	Experiment Details	Ref.	Marks
1	Study of i) ns2 network simulator and its Installation over Linux OS and ii) Graph Theory for computer network.	1,2	5
2	Study all network topologies viz. Bus, Star, Ring and Mesh etc. and their simulation using ns2 simulator.	1,2	5
3	Simulate Stop and Wait Protocol using ns2 simulator for the given scenario.	1,2	5
4	Simulate Sliding Window Protocol using ns2 simulator for the given scenario.	1,2	5
5	Write a C/C++ program for the simulation of Cyclic Redundancy Check and Hamming codes for the given scenario.	1,2	5
6	Simulate Link state routing protocol in C/C++ language for the given scenario.	1,2	5
7	Simulate Distance vector routing protocol in C/C++ language for the given scenario.	1,2	5
8	Implement the following two application servers: a) A tinny FTP server (tftpserver) which accepts a connection from a client program (cftp). It accepts upto 5 connection simultaneously. It supports only three basic operations. viz. i) get <source><destination> ii) put <source><destination>	1,2	5

Semester VI

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
CPC601	System Programming and Compiler Construction	4	-	--	4	-	--	4
		Examination Scheme						
		ISE		MSE		ESE		
		10		30		100 (60% Weightage)		

Pre-requisite Course Codes	CPC502 (Operating System)
-----------------------------------	---------------------------

At end of successful completion of this course, student will be able to

Course Outcomes	CO1	To understand the basics of system programs like editors, compiler, assembler, linker, loader, interpreter and debugger.
	CO2	To understand concepts of assemblers and write macros as and when required to increase readability and productivity.
	CO3	To understand the various phases of compiler and working of parsers.
	CO4	To understand role of Intermediate Code Generation in connection with language designing and apply optimization principles on given code.
	CO5	To analyze the role of Operating System functions such as memory management aspertaining to run time storage management.

Module No.	Topics	Ref.	Hrs.
1	System Software Concept, introduction to various system programs such as assemblers, loaders , linkers ,macro processors, compilers, interpreters, operating systems, device drivers	1-5	01
2	Assemblers General Design Procedure , Design of Assembler (Single Pass –Assembler IBM PC , multi pass Assembler - IBM 360/370 Processor),Statement of Problem , Data Structure , format of Databases , Algorithm, Look for modularity	1-5	06
3	Macros & Macro processors Macro instructions, Features of Macro facility, Design of 2 passmacroprocessor	1-5	04
4	Loaders and Linkers Loader schemes, Design of Absolute loader , Design of Direct linking Loader	1-5	04
5	Software Tools Software Tools for Program development, Editors: Types of	1-5	02

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

	Editors,Design of Editor ,Debug Monitors		
6	Compilers Introduction to Compilers, Phases of a compiler, comparison ofcompilers and interpreters.	1-5	02
7	Lexical Analysis Role of a Lexical analyzer, inputbuffering, specification andrecognition of tokens, Designing a lexical analyzer generator,Patternmatching based on NFA's.	1-5	02
8	Syntax Analysis Role of Parser, Top down parsing, Recursive descent and predictiveparsers (LL), Bottom Up parsing, Operator precedence parsing, LR,SLR and LALR parsers.	1-5	08
9	Syntax Directed Translation Syntax directed definitions, Inherited and Synthesized attributes,Evaluation order for SDDs , S attributed Definitions , L attributedDefinitions	1-5	03
10	Intermediate Code Generation Intermediate languages: declarations, Assignment statements,Boolean expression, case statements, back patching, procedure calls.	1-5	04
11	Code Generation Issues in the design of Code Generator , Basic Blocks and Flow graphs, code generation algorithm , DAG representation of Basic Block	1-5	04
12	Code Optimization Principal sources of Optimization, Optimization of Basic Blocks, Loops in Flow graph ,Peephole Optimization	1-5	03
13	Run Time storage Storage Organization , storage allocation strategies, parameterpassing , Symbol table , introduction to garbage collection andcompaction	1-5	04
14	Compiler-compilers JAVA compiler environment, YACC compiler-compiler	1-5	01
Total			48

		Examination Scheme						
		ISE		MSE		ESE		
		10		30		100 (60% Weightage)		

Pre-requisite Course Codes	CSC404 (Database Management System)
-----------------------------------	-------------------------------------

At end of successful completion of this course, student will be able to

Course Outcomes	CO1	Students can understand the principles and foundations of distributed databases.
	CO2	Students can design and implement distributed database for enterprise applications using fragmentation and allocation concepts
	CO3	Students can learn the distributed transaction management and concurrency control in distributed databases using different algorithms.
	CO4	Student can understand deadlock handling and database recovery in distributed environment.
	CO5	Student can understand the query processing and optimization and also to learn the Architecture of Heterogeneous Database.
	CO6	To learn the integration of schemas using XML.

Module No.	Topics	Ref.	Hrs.
1	Concept and Overview Distributed Database system What is Distributed Database System (DDBS), Features of DDBS, promises of DDBS, Design issue in DDBS, Distributed DBMS architecture: Client/server System, Peer-to-Peer, Mutli-Databasesystem.	1-5	08
2	Distributed Database Design Distributed database design concept, objective of Data Distribution, Data Fragmentation, The allocation of fragment, Transparencies in Distributed Database Design	1-5	08
3	Distributed Transaction and concurrency control Basic concept of Transaction management, objective Distributed transaction management, Model for Transaction management, Distributed Concurrency control: Objective, concurrency	1-5	08

Pre-requisite Course Codes	CPC602 (Software Engineering)
-----------------------------------	-------------------------------

At end of successful completion of this course, student will be able to

Course Outcomes	CO1	To define characteristics of a project.
	CO2	To appreciate project management principles, risk in environment and the management challenges for effective project management.
	CO3	To apply the project management principles across all phases of a project.
	CO4	To demonstrate use of tools and techniques for the management of a project plan, monitor and controlling a project schedule and budget, tracking project progress

Module No.	Topics	Ref.	Hrs.
1	An overview of IT Project Management Introduction, the state of IT project management, context of project management, need of project management, project goals, project lifecycle and IT development, extreme project management, PMBOK.	1-11	02
2	Conceptualizing and Initializing the IT Project An information technology project methodology (ITPM), project feasibility, request for proposal (RFP), the business case, project selection and approval, project contracting, IT governance and the project office.	1-11	04
3	The Human Side of Project Management Introduction, organization and project planning, the project team, the project environment.	1-11	02
4	Developing the Project Charter and Project Plan Introduction, project management process, project integration management, the project charter, project planning framework, the contents of a project plan, the planning process, The Work Breakdown Structure (WBS), the linear responsibility chart, multidisciplinary teams.	1-11	04

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

5	The Scope Management Plan Introduction, scope planning, project scope definition, project scope verification, scope change control.	1-11	04
6	The Project is Schedule, Budget and Risk Management Introduction, developing the project schedule, project management, software tools, methods of budgeting, developing the project budget, improving cost estimates, finalizing the project schedule and budget. IT project risk management planning process, identifying IT project risks, risk analysis and assessment, risk strategies, risk monitoring, and control, risk responses and evaluation.	1-11	08
7	Allocating Resources to the Project Resource loading, resource leveling, allocating scarce resources to projects and several projects, Goldratt's critical chain.	1-11	03
8	The Project Communication Plan Introduction, monitoring and controlling the project, the project communications plan, project metric, project control, designing the control system, the plan-monitor-control cycle, data collection and reporting, reporting performance and progress, information distribution.	1-11	02
9	Managing Change, Resistance and Conflicts	1-11	02
10	Managing Project Procurement and Outsourcing Introduction, project procurement management, outsourcing.	1-11	02
11	Project Leadership and Ethics Introduction, project leadership, ethics in projects, multicultural projects.	1-11	01
12	The Implementation Plan and Project Closure Introduction, project implementation, administrative closure, project evaluation, project audit.	1-11	02
Total			36

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
CPE6013	Elective-IGerman	-	-	2+2*	-	-	2	2
		Examination Scheme						
		ISE	ESE		Total			
			Practical	Oral				
50	-	-	50					

Pre-requisite Course Codes	-	
At end of successful completion of this course, student will be able to		
Course Outcomes	CO1	Construct grammatically correct German sentences
	CO2	Extend the German vocabulary
	CO3	Use proper pronunciation and phonetics while communicating
	CO4	Write and read German in efficient manner

Module No.	Topics	Ref.	Hrs.
1	Basic Grammar, pronunciation and basic expression	1,2	08
2	Communication Greetings , beginning of conversation, Introduction of oneself , numbers , counting and dates	1,2	08
3	Reading , Comprehension and writing - (Type of Text) Dialogs, Monologs , Biodata,	1,2	05
4	Family Structures Culture Computer and Multimedia Work culture	1,2	10
5	Corporate communication Emails , Technical Reports , Making presentations	1,2	05
Total			28

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned				
		L	T	P	L	T	P	Total	
CPL601	Networking Programming Laboratory	--	--	4	--	--	2	2	
		Examination Scheme							Total
		ISE		ESE			Total		
		40		-		20		60	

Pre-requisite Course Codes	CPC504 (Computer Networks)	
At end of successful completion of this course, student will be able to		
Course Outcomes	CO1	Configure Linux Network, View and edit routing tables.
	CO2	Configure Linux FTP server, DNS server and web server.
	CO3	Implement Sockets programming and understand TCP/IP.
	CO4	Provide and appreciate security features for network.

Exp. No.	Experiment Details	Ref.	Marks
1	A. Study of Networking Commands (Ping, Tracert, TELNET, nslookup, netstat, ARP, RARP) and Network Configuration. B. Linux Network Configuration. Determining IP Address and MAC Address using ifconfig command. <ul style="list-style-type: none"> a. Configuring NIC's IP Address b. Changing IP Address using ifconfig. c. Static IP Address and Configuration by Editing. d. Determining IP Address using DHCP. e. Configuring Hostname in /etc/hosts file. 	1	5
2	Linux Networking Commands. <ul style="list-style-type: none"> a. Using netstat and route commands to do the following. <ul style="list-style-type: none"> i. View current routing table. ii. Add and delete routes. iii. Change default gateway. b. Configuring remote login Services, telnet & ssh. c. Configuring IPTables. 	1	5
3	A. To configure Linux FTP server using VSFTPD. <ul style="list-style-type: none"> a. Set up anonymous access of FTP server. b. Enable individual logins and add FTP users with Read only access. c. Transfer Files. 	2	5

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned				
		L	T	P	L	T	P	Total	
CPCL601	System Programming and Compiler Construction Lab	--	--	2	--	--	1	1	
		Examination Scheme							Total
		ISE		ESE		Total			
				Practical	Oral				
		40	20	-	60				

Pre-requisite Course Codes	CPC601 (System Programming and Compiler Construction)
-----------------------------------	---

At end of successful completion of this course, student will be able to

Course Outcomes	CO1	To use Flex or similar tools to create a lexical analyzer and Yacc/Bison tools to create a parser.
	CO2	To implement different types of handwritten parsers.
	CO3	To implement the working of assembler and Macros.
	CO4	To demonstrate linkers and loaders.

Exp. No.	Experiment Details	Ref.	Marks
1	Lex program to generate tokens (identifiers, keywords, operators, delimiters, etc.) for Java Programming language. Program should generate at least 50 tokens and it should recognize unique identifiers.	1	5
2	Program to remove left recursion for the given grammar. Program should accept the grammar from user, detect left recursion and eliminate it by generating a new non-terminal.	3,4	5
3	Implement Predictive Parser for the given grammar.	3,4	5
4	Program to find first and follow sets for the given grammar. Program should accept the grammar from user and output the first and follow sets for each of the grammar symbol.	3,4	5
5	Program to generate Quadruple table for the given postfix String	3,4	5
6	Implement two pass Assembler for IBM 360/370 machine. The input is a source consisting of syntactically correct IBM 360/370 statement. The output should display all tables and their values. The final output is an object file of small subset of instructions.	2	5
7	Implement MACRO Assembler for IBM 360/370 for the feature "Conditional MACRO expansion".	2	5
8	Create user defined library in open source environment and use it for		5

Pre-requisite Course Codes	CPC602 (Software Engineering)	
At end of successful completion of this course, student will be able to		
Pre-requisite Course Codes	-	
Course Outcomes	CO1	Select process model for a given problem.
	CO2	Plan, design, develop and validate software project.
	CO3	Apply estimation and scheduling techniques.
	CO4	Analyze and mitigate risks in software project.
	CO5	Apply advance software methodology to create high quality Web Apps.

Exp. No.	Experiment Details	Ref.	Marks
1	Create SRS in IEEE format for a case study.	1,2,3	5
2	Apply process model to a case study.	1,2,3	5
3	Create Work Breakdown Structure and schedule using project management tool for the case study.	1,2,3	5
4	Estimation using function point.	1,2,3	5
5	Develop test plan. (Acceptance test plan, White box test cases)	1,2,3	5
6	Risk estimation.	1,2,3	5
7	Automated testing using testing tool.	1,2,3	5
8	Mini Project.	1,3,4	5

-----------------------------------	--------------------------------

At end of successful completion of this course, student will be able to

Course Outcomes	CO1	To understands fragmentation concepts practically.
	CO2	To analyze best algorithm for concurrency control
	CO3	To create and parse XML Documents
	CO4	To gain knowledge of actual Query Processing , optimization and Deadlock detection

Exp. No.	Experiment Details	Ref.	Marks
1	Perform Fragmentation (PHF, DHF, VF, and HF) and allocation in DDBS design.	1,4	5
2	Case study on Concurrency control algorithms	1,3,4	5
3	Creating an XML Document and Defining XML Attributes	1,2,4	5
4	Working with XML Parsers	1,2,4	5
5	Implementation of query optimization	1,4	5
6	Implementations of two phase or three phases commit protocol	1,4	5
7	Implementations of deadlock detection in DDB	1,2	5
8	Mini Project	1,2,3,4	5

Pre-requisite Course Codes	CPC604 (Mobile Communication and Computing)
At end of successful completion of this course, student will be able to	
Course Outcomes	CO1 To Configure Wireless Access Point.
	CO2 To Execute WAP program.
	CO3 To Simulate different scenario using various simulators.
	CO4 To develop Mobile apps.

Exp. No.	Experiment Details	Ref.	Marks
1	To setup a wireless access point under given scenario.	1	5
2	To write and execute WML and WMLS program for different Scenario	2	5
3	To use GSM modem for executing AT commands in given scenario.	3	5
4	To simulate a given scenario using GNS3 Simulator.	4	5
5	To simulate GSM scenario using Netsim.	5	5
6	To simulate CDMA scenario using Netsim.	5	5
7	To develop a simple Android App.	6	5
8	To develop an Android App to Access the device hardware.	6	5
