

Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
(Autonomous Institute Affiliated to University of Mumbai)

Revision: SPIT-2-17

Bachelor of Engineering/Technology (B.E./B.Tech)
in
Computer Engineering

Second Year Engineering
(Sem. III and Sem. IV)
Effective from Academic Year 2017 -18

Principal

Principal
Sardar Patel Institute of Technology
Bhavans Andheri Campus
Munshi Nagar, Andheri (West)
Mumbai - 400 058.

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

Preamble:

Concept of academic autonomy is based on the argument that Institutions can undertake the work expected of them by all stakeholders such as Students, Parents, University, Industry, Society in general, only if they have freedom of choice and action.

We at S.P.I.T. would like to believe that this freedom of choice and action as far as academics is concerned will make us more Proactive in our offerings.

An academic autonomy is as good as its Curricula and execution of it is as well as its faculty. S.P.I.T. is confident of succeeding on both the fronts.

In the first offering we have tried to pro-actively bridge the ever discussed “Industry-academic gap” by way of our SCOPE program. The issue about sensitizing students to social needs is being addressed by special activity based courses. Liberal arts courses have been introduced to enhance functionality of both sides of brain. In all this the professional core has not been overlooked. Thus the curricula are designed to achieve multi dimensional outcomes.

The evaluation mechanism is tuned for assessing the attainment of the designed outcomes and is designed as a fair mechanism.

As our learning cycle begins from July 2017, I wish to place on record that entire S.P.I.T. staff and faculty will work with singular focus and commitment towards the success of this endeavour.

Dr. Prachi Gharpure
Principal, S.P.I.T.

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

From the Desk of Dean Academics

Greetings and congratulations to all the students, teaching and supporting staff of Sardar Patel Institute of Technology for getting autonomous status to the institute from the year 2017-18. We look towards autonomy as a great opportunity to design and implement curriculum sensitive to needs of Indian Society and Industries.

In the proposed curriculum we have made an attempt to provide opportunity for students to develop themselves as competent engineering graduates with knowledge, skill and ethical behavior required for global career. Curriculum is designed to provide multiple learning opportunities for students to acquire and demonstrate competencies for rewarding careers. The curriculum model is outcome based that focuses on learning by doing. This is achieved through activity based learning, minor projects, problem solving and innovative styles of pedagogy. Various steps are taken to transform teaching-learning process to make learning a joyful experience for students. Special laboratory based courses are introduced to give more practical exposure to the students.

To create socially responsible citizen curriculum offers courses like Constitution of India, Environmental Studies and Human Health Systems Approach. Also various activity based learning modules like 'Building Automation, Fire Safety and Electronic Security', 'Occupational Safety & Legal Studies for Engineers', 'Technical Presentation Skills', 'Technical Paper and Patent Drafting', 'Engineering Solution for Environmental Problems' and 'Financial Planning, Taxation Policies and Investment' are introduced. For overall development of the learner, various elective courses like Yoga Vidya, Music Appreciation, Dramatics, Industrial and Organizational Psychology, Law for Engineers, French Language, German Language etc. are introduced. To encourage interdisciplinary studies institute level Open Elective courses are offered.

One of the special feature of this curriculum is Skill development programme called SCOPE (Skill Certification for Outcome-Based Professional Education) planned to enhance employability, innovation and research culture in the institute. Every department is offering six domain specific tracks, each track containing six courses. Student will have an opportunity to enroll for more than 140 courses in any of the department of his choice. Some of the courses under SCOPE will be delivered in co-ordination with industries.

We believe that this curriculum will raise the bar of academic standards with the active involvement and cooperation from students, academic and administrative units. Faculty of S.P.I.T. deserves a special appreciation for their relentless efforts in designing curriculum and assessment instruments which will bring transformation in the quality and transparency in assessment of learners.

Looking forward for your active cooperation and constructive feedback to create vibrant and joyful learning environment at Sardar Patel Institute of Technology.

Dr. Surendra Singh Rathod
Professor and Dean Academics

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

Message from Head of the Department

The Computer Engineering is organized and administrated in accordance to industry to provide a professional atmosphere for students to enrich the discipline of computer. In particular, we aim, to produce highly qualified and all round graduates not only possessing fundamental knowledge of computing and technology but also to provide leadership and service to the community. The objective of the syllabus is to train students for reading, innovative thinking, and presentation habits. The Department is offering a well-balanced undergraduate computer engineering program designed considering technological, scientific, and humanistic study. B.Tech. programme is a 180-credit degree programme, which is spread over 8 semesters for a full-time student.

The syllabus is directional in wide scope and allows the much desired flexibility to keep speed with the ever growing body of knowledge and explorations in ICT enabled industries considering human side of enterprise. The course structures are carefully designed so that students get superiority in dealing with diverse situations when they step into the corporate world. The Skill Certification for Outcome-based Professional Education (SCOPE) Courses which are framed with respect to Industry expectations in mind surely helps students to develop their skills required.

Sardar Patel Institute of Technology's has taken a lead in incorporating philosophy of Choice Based Education in the process of curriculum development. This program subscribes to the view that a bachelor degree can be used as a stepping stone for master degree and research as well. We give you best wishes to take this syllabus and travel the path of success.

Dr. D. R. Kalbande
Head of Computer Engineering Department

Semester III

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India

(Autonomous Institute Affiliated to University of Mumbai)

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
BS31	Applied Mathematics-I	3	1	--	3	1	--	4
		Examination Scheme						
		ISE		MSE		ESE		
		10		30		100 (60% Weightage)		

Course Objectives:

- To familiarize learners with mathematical tools and methods to solve engineering problems.

Course Outcomes:

Pre-requisite course codes	BS11 (Engineering Mathematics I) BS21 (Engineering Mathematics II)
After successful completion of the course, student will be able to	
Course Outcomes	CO1 Check analyticity of function of complex variables
	CO2 Find Laplace and Inverse Laplace Transforms
	CO3 Apply Laplace and Laplace Inverse methods to solve differential equations with initial conditions
	CO4 Expand functions in terms of sine and cosine series on the given interval
	CO5 Evaluate Z-transform and Inverse Z-transform
	CO6 Formulate and solve Linear Programming Problem arising in engineering

Module No.	Module name	Unit No.	Topics	Ref	Hrs
1	Complex Variables	1.1	Analytic functions, Cauchy Riemann equations in Cartesian coordinates and Polar coordinates.	1,2	03
		1.2	Harmonic functions, Analytic method and Milne Thomson methods to find $f(z)$, Orthogonal trajectories.		04
2	Laplace & Inverse Laplace Transform	2.1	Definition of Laplace transform, Laplace transform of constant, trigonometric, exponential functions.	2,4	02
		2.2	Properties of Laplace transform: First shifting theorem, Laplace transform of $L\{t^n f(t)\}, L\{f(t)/t\}, L\{\frac{d^n}{dt^n} f(t)\}, L\{\int_0^t f(u)du\}, L\{f(at)\}$ without proof.		04

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India

(Autonomous Institute Affiliated to University of Mumbai)

		2.3	Inverse Laplace transform with Partial fraction and Convolution theorem (without proof).		04
		2.4	Application to solving Differential Equations with given initial conditions.		02
3	Fourier series	3.1	Introduction to Fourier Series, Dirichlet's conditions of convergences, Fourier series of periodic functions with period 2π and $2L$.	1,2,3	04
		3.2	Fourier series for even and odd functions		02
		3.3	Half range sine and cosine Fourier series, Parseval's identities (without proof).		02
		3.4	Orthogonal and Orthonormal functions, Complex form of Fourier series.		02
4	Z transform	4.1	Z-transform of standard functions such as $Z(a^n)$, $Z(\cos ak)$, $Z(\sin ak)$, etc.	1,2	01
		4.2	Properties of Z-transform :Linearity, Change of scale, Shifting property, Multiplication of K, Initial and final value, Convolution theorem (all without proof).		02
		4.3	Inverse Z transform: Method of Partial fraction.		02
5	Mathematical Programming	5.1	Introduction to Linear Programming problems and its formulation. Graphical method to solve LPP in two variables, Simplex method to solve LPP	2,3,5	03
		5.2	Artificial variables, Big -M method (method of penalty). Revised and two phase simplex methods.		03
		5.3	Duality, Dual simplex method.		02
Total					42 hrs

NOTE: ISE component will be evaluated through assignments conducted in the tutorial sessions(tutorials will be conducted class -wise)

Pre-requisite Course Codes	ES4 (Programming Methodology and Data Structures)	
At the end of successful completion the course, students will be able to		
Course Outcomes	CO1	Apply various operations like traversing, retrieving, storing data using linear and non-linear data structures.
	CO2	Demonstrate and apply concepts of Trees and Graphs to a given problem.
	CO3	Compare various Heap Structure
	CO4	Summarize hashing and collision resolution techniques

Module No.	Unit No.	Topics	Ref.	Hrs.
1		Linear and Non-linear Data Structures Introduction to Data Structures (Stack, Queue and Singly Linked List), Circular Linked List, Doubly Linked List, Application of Linked List.	1,2	05
2	2.1	Trees Binary Tree Terminology, Binary Search Tree and its operations, Binary Tree Traversal, Expression Tree	1,2	04
	2.2	AVL Trees- Properties of AVL trees, Rotations, Insertion, and Deletion	1,2	03
	2.3	B-Trees- Definition of B-trees, Basic operation of B-Trees, Deleting a key from B-Trees	1,2	04
	2.4	Introduction to B+ Trees	1,2	03
	2.4	Introduction to Multidimensional Trees, Segment trees, k-d trees, Point Quad trees	3	05
3	3.1	Heap Structure Introduction to Heap Structures, Min Heap, Max Heap, Construction of Heap	2	04

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

	3.2	Fibonacci heaps- Structure of Fibonacci heaps, Mergeable heap, operations, Decreasing a key and deleting a node	2	06
4		Hashing Introduction to Hash Table, Hash functions, Collision Resolution Technique	1,2	04
5		Graph Introduction To Graph, Representation of Graph- Adjacency Matrix, Adjacency List, Graph Traversal Technique	1,2	04
Total				42

Pre-requisite Course Codes	ES11 (Basic Electrical and Electronics Engineering)	
After successful completion of the course, student will be able to:		
Course Outcomes	CO1	Design of digital circuits using SOP & POS forms.
	CO2	Construct combinational circuits using given MSI devices.
	CO3	Apply the knowledge of flip-flops and MSI to design counters and Shift registers.
	CO4	Design state machines for given state diagrams after state reduction.
	CO5	Describe different types of programmable logic devices like PAL, PLA, CPLD and FPGA.

Module No.	Unit No.	Topics	Ref.	Hrs.
1	1.1	Introduction to Number System & Digital Logic: Introduction to Number System, Basic gates, Universal gates, Sum of products and products of sum, minimization with Karnaugh Map (up to four variables) and realization. Quine McCluskey method.	1,2,3	16
	1.2	Logic Families: Types of logic families (TTL and CMOS), characteristic parameters (propagation delays, power dissipation, Noise Margin, Fan-out and Fan-in), transfer characteristics of TTL NAND, Interfacing CMOS to TTL and TTL to CMOS.	1,2,3	
	1.3	Combinational Circuits using basic gates as well as MSI devices: Half adder, Full adder, Half Subtractor, Full Subtractor, Multiplexer, De-multiplexer, Decoder, Comparator (Multiplexer and De-multiplexer gate level up to 4:1).	1,2,3	
2	2.1	Sequential Logic: Latches and Flip-Flops. Conversions of Flip-Flops, Timing Considerations and Metastability	1,2,3,4	05
3	3.1	Counters: Asynchronous, Synchronous Counters, Up Down Counters, Mod Counters.	1,2,4,5	11
	3.2	Mealy and Moore Machines, Clocked synchronous state machine analysis, State reduction techniques and state assignment, Clocked synchronous state machine design.	1,2,4,5	
	3.3	MSI counters and applications.	1,2,4,5	
4	4.1	Shift Registers: Shift Registers, Ring Counters, Universal Shift Register, MSI Shift registers and their applications.	1,2,4,5	05
5	5.1	Programming Logic Devices: Concepts of Programmable Array	1,2,4,5	05

Pre-requisite Course Codes	ES11 (Basic Electrical and Electronics Engineering) CE32 (Digital Logic Design and Analysis)
After successful completion of the course, student will be able to:	
Course Outcomes	CO1 Construct and test logic circuits using logic gates to realize given function.
	CO2 Construct and Test logic circuits using MSI ICs to realize given function.
	CO3 Validate and test the design of combinational and sequential logic circuits by hardware implementation.
	CO4 Develop an application using concepts of digital circuits.

Exp. No.	Experiment Details	Ref.	Marks
1	To implement the combinational logic for given function using basic gates/MSI ICs.	1,2	5
2	To interface TTL and CMOS logic families with each other.	1,2	5
3	To implement 4-bit, 5-bit and 8 bit comparator using MSI ICs	1,2	5
4	To implement gate level multiplexers and MSI multiplexers	1,2	5
5	To design and implement MSI circuits of flip-flops	1,2	5
6	To design and implement mod 4 synchronous up/down counter using JK flip-flop	1,2	5
7	To configure MSI devices as asynchronous counter, synchronous counter as synchronous counters and universal shift register.	1,2	5
8	Mini-Project: Design and implement an application using digital circuit concepts.	1,2	5

Although the grades are given they will not mentioned in final grade card but they are necessary to declare the successful completion of the Non-Credit course.

Course Objectives: To improve the basic mathematical skills for solving engineering problems.

Course Outcomes:

Pre-requisite Course Codes	-
At the end of successful completion the course, students will be able to	
Course Outcomes	CO1 To find basic derivatives, Integration and limits.
	CO2 To find rank of a matrix and solve system of linear equations using rank.
	CO3 To find partial derivative of a function and apply it to extremise functions.
	CO4 To solve differential equations of first and higher order.
	CO5 To find roots & logarithm of a complex number.

Module No	Module name	Unit No.	Topics	Ref.	Hrs.
1.	Derivatives	1.1	Derivative of functions which are expressed in one of the following form a) product of functions, b) quotient of functions, c) derivatives of trigonometric function	1,2,5,6,7	1
		1.2	Application of Derivatives: Rolls theorem and Mean value theorem	1,2,5,6,7	1
2.	Integration	2.1	Indefinite integrals- methods of integration, substitution method.	1,2,5,6,7	1
		2.2	Evaluation of definite integral 1) by substitution,	1,2,5,6,7	1

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India

(Autonomous Institute Affiliated to University of Mumbai)

			2) integration by parts,		
3.	Basic of Matrices	3.1	Rank of Matrix, Normal form	1,2,3,4,6	1
		3.2	Consistency and solution of simultaneous linear homogeneous and Non-homogeneous equations. Linear Dependence & independence vectors	1,2,3,4,6	1
4.	Partial Differentiation	4.1	Partial derivatives of first and higher order, Chain Rule & Composite function	1,2,3,4,7	1
		4.2	Euler's theorem on homogeneous functions with two and three independent variables	1,2,3,4,7	1
		4.3	Application of partial derivatives: Maxima and Minima of functions of two variables.	1,2,3,4,7	1
5.	Differential Equations of first & higher order	5.1	Exact Differential Equation,	1,2,3,4,	3
		5.2	Linear Differential Equation with constant coefficient-complementary function, particular integrals of differential equation of the type $f(D)y = X$ where X is $e^{ax}, \sin(ax+b),$		
		5.3	$\cos(ax+b), x^m, e^{ax} V, xV.$		
6.	Indeterminate forms	6.1	Indeterminate forms, L-Hospital Rule	7	1
7.	Basics of Complex Numbers	7.1	Roots of complex numbers by De'moivre's Theorem	1,2,3,4	1
		7.2	Relation between circular and hyperbolic function		1
		7.3	Logarithm of complex numbers.		1
Total					16

BS41	Applied Mathematics-II	3	1	--	3	1	--	4
		Examination Scheme						
		ISE		MSE		ESE		
		10		30		100 (60% Weightage)		

Course Objectives:

- To familiarize learners with mathematical tools and methods to solve engineering problems

Course Outcomes:

Pre-requisite course codes	BS11 (Engineering Mathematics I) BS21 (Engineering Mathematics II)	
After successful completion of the course, student will be able to		
Course Outcomes	CO1	Check if matrix is diagonalizable, derogatory & to calculate functions of a square matrix.
	CO2	Find Correlation between two variables.
	CO3	Find the measures of central tendency
	CO4	Solve a problem by identifying the appropriate distribution.
	CO5	Test the hypothesis for means and variances for single and multiple samples using 't' & chi-square distribution tests.

Module No	Module name	Unit No.	Topics	Ref.	Hrs.
1	Matrices	1.1	Eigen values and Eigen vectors and its properties.	1,3,4	04
		1.2	Cayley-Hamilton theorem and its applications.		02
		1.3	Similar matrices, diagonalizable matrices. Singular Value Decomposition.		04
		1.4	Derogatory and non-derogatory matrices, functions of square matrix.		03
		1.5	Application to finding google page rank		01
2	Probability	3.1	Random Variables: - discrete & continuous random variables, expectation, Variance, Probability Density Function & Cumulative Density Function.	2,3,4,5	04

		3.2	Moments, Moment Generating Function.		02
		3.3	Probability distribution: binomial distribution, Poisson & normal distribution.		07
3	Sampling Theory	4.1	Sampling, point and interval estimations, Test a hypothesis using Large sample test	2,3,4 ,5	04
		4.2	Testing of hypothesis using 't' and chi-square distribution tests.		04
4	Correlation and Regression	2.1	Karl Pearson's coefficient of correlation, covariance, Spearman's rank correlation		03
		2.2	Regression.	1,3,4	04
Total					42hrs

NOTE: ISE component will be evaluated through assignments conducted in the tutorial sessions. (tutorials will be conducted class –wise)

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
LA1	Yoga-Vidya	1	-	-	Non-Credits			
		Examination Scheme						
		ISE1		ISE2		Attendance		Total
		20		20		10		50

Student will be evaluated after six sessions for 20 Marks (ISE1) and at the end of last session for 20 Marks (ISE2). Grade equivalent to 'D' (50%-59.99% Marks) or above is considered as 'Satisfactory'. If any of the tasks given is not completed/submitted/shown/evaluated then the corresponding lower grade will be given. Although the grades are given they will not mentioned in final grade card but they are necessary to declare the successful completion of the Non-Credit course.

Pre-requisite Course Codes		-
At end of successful completion of this course, student will be able to		
Course Outcomes	CO1	Perform various techniques of Yoga
	CO2	Follow healthy habits to improve immune system
	CO3	Describe the importance of Yoga in one's life
	CO4	Make resolution to practice techniques of Yoga

Through this course, students will get an all round experience of how Yoga can benefit their body, breath, emotions along with relaxation techniques to maintain a calm and balanced state of mind.

Day No.	Topics	Hrs.
1	What is Yoga, why Yoga? Techniques: warm up stretches for hands, legs, neck; Sukhasana, Padmasana	1
2	Introduction to Ashtanga Yoga Techniques: Talasana, Utkatasana, Konasana 2	1
3	Asana classification and importance of different types of Asanas Techniques: Sthita-prarthanasana, Ekpadasana, Garudasana	1
4	Yogendra rhythm- breathing pattern Techniques: Parvatasana, Yashtikasana	1
5	Forward bending and abdominal compression Techniques: Konasana 3, Yogamudra	1
6	Shuddhi Kriyas- Prevention of diseases by improving immune system Techniques: Jalaneti, Kapalabhati	1
7	Yogic Aahar Techniques: Vajrasana, Pavanmuktasana	1
8	Relaxation and it's importance Techniques: Shavasana	1
9	Spine and it's importance in Yoga Techniques: Bhujangasana, Makarasana, Vakrasana	1
10	Pranayama Techniques: Basic techniques	1

11	Attitude training Techniques: connecting techniques to concepts.	1
12	Pranayama Techniques: Traditional Pranayama	1
13	Yogachara- The Yoga way of living Techniques: Games	1
14	Revision	1

'Activity Based Learning'

ABL1: Building Automation, Fire Safety and Electronic Security

This is non-credit activity conducted in semester III for all the branches of engineering. It is compulsory for all the students to appear for this activity.

This is one day event involving following activities:

1. Invited Talks on the related topics
2. Poster Presentation
3. Fire/Safety Drills
4. Design competition in building automation, fire safety and security.

This event shall be conducted in association with Fire and Security Association of India (FSAI).

ABL2: OCCUPATIONAL SAFETY & LEGAL STUDIES FOR ENGINEERS

Engineering is the branch of science and technology concerned with design, building and the use of engine, machines and structures. In this fast moving world scenario, it is seen that the field of Engineering has travelled a very long distance of time space. In the modern parlance, this field must be properly knitted with the other two important dimensions—SAFETY & LAW. An Engineer must have adequate knowledge of these vital subject if he ever wishes to establish himself in this Industrial world.

The following activities have been designed to meet up with the growing expectations with the concerned topic. Students are requested to actively participate in those activities based learning to catch up with the realities of the industrial world.

Hence, the activities are divided into 5 parts—MOOT COURT, DEBATE, ELOCUTION, PRESENTATION & ROLE PLAY

1) MOOT COURT:

It is a process in which participants take part in simulated court proceedings, usually involving drafting memorials or memoranda and participating in oral argument. It is just a dummy presentation of the actual court proceedings. It will have a pair of counsel from the defendant as well as the prosecution side. The case write up will be given to both the sides

well in advance. They need to study the case along the lines of actual law pertaining to the case which will be more or less company law, intellectual property laws, banking laws, insurance laws or negotiable instrument laws. Both sides will have a researcher who will work along with his respective team to unearth any backdated supportive cases. The sides has to come in common consensus to work on issues which should not be more than five. Based on those issues both sides will present their case turn by turn with the permission of the judge. Judge can consist of persons ranging from 1 to 3. The issues should be dealt with in the book called memorial which should be prepared by both the sides. The prosecution will start the case followed by the defendants. Nobody can criss-cross each other's time of presentation. The judge/s have to control the whole proceedings properly. The judge has the power to give permission for rebuttal as per his own whims. In the end he will pass the judgment based on law.

2) **DEBATE:**

Debates will have topics based on safety and law based and the pair of participants need to stand for or against the motion.

3) **ELOCUTION:**

Same will be the case with elocution but it will be extempore and the participants will have to present their insights on the topic given on the spot.

4) **PRESENTATION:**

A PPT presentation will have topics based on legal laws and students need to prepare the same.

The list of topics are:

Sale deed, WILL, Gift Deed, Agreement, Power of attorney, MOU(Memorandum of Understanding), Non-Disclosure agreements, Affidavit, Charter, Partnership deed, Copyrights Transfer Agreement, Franchise Termination, Lease purchase contract, Letters Patent, Legal Threat, Promissory Note, Share Certificate, Share transmission.

5) **ROLE PLAY:**

This activity is a group activity whereby they have to work as a team and enact some situation pertaining to law or safety in the Industrial premises. It's a fun activity whereby they camouflage themselves stepping into the shoes of the role that they will be performing to create an awareness amongst the audience of what to do in case they find themselves in same situations in near future.

Competitive Examinations Preparation (CEP): (Extra credits=2)

Salient Features of CEP:

- It is optional module
- Motivation, mentoring and preparation of students to pursue higher education
- Modules as per national level technical competitive examination **GATE**
- Motivation, mentoring and preparation of students to join public sector or government organizations like BARC, DRDO etc.
- Motivation, mentoring and preparation of students to join top ranking technical institutes in country like IISc and IIT.
- Module design as per the courses studies in that semester or prior semester by considering syllabus of GATE examination
- Help to sharpen the problem solving skills of students and concerned teachers
- Course mentors will be allotted at the start of academic year
- Two (2) extra credits will be given if
 1. Student submit **Valid Gate Score card**.
 2. Must pass CEP1 to CEP6 in modal question papers given by the faculty
 3. Maintains regular contact with CEP course teachers

CEP Courses:

Semester III:

CEP1: Introduction to CEP

One hour introduction session to entire class about CEP.

Student shall be assigned as 'Teaching Assistant' to Engineering Mathematics Course –I.

Student shall maintain regular contact with the semester III course teachers (once in a week per course). Teacher shall maintain the attendance of the student. Teacher shall mentor student and give assignments with GATE level problems to solve. At least TWO assignments per course shall be submitted by the student.

After End Semester Examination student shall appear for the Model Test paper based on the pattern of the actual GATE Examination. This paper shall be based on the contents of Semester-I and Semester-III courses. The negative marking is applicable as per GATE pattern.

The student shall obtain minimum 10 marks to continue registration in CEP module for next semester onwards.

Semester IV:
CEP2: Problem solving module-I

Student shall be assigned as ‘Teaching Assistant’ to Engineering Mathematics Course–II and Basics of electrical Engineering.

Student shall maintain regular contact with the semester IV course teachers (once in a week per course). Teacher shall maintain the attendance of the student. Teacher shall mentor student and give assignments with GATE level problems to solve. At least TWO assignments per course shall be submitted by the student.

After End Semester Examination student shall appear for the Model Test paper based on the pattern of the actual GATE Examination. This paper shall be based on the contents of Semester-II and Semester-IV courses. The negative marking is applicable as per GATE pattern.

The student shall obtain minimum 10 marks to continue registration in CEP module for next semester onwards.

Semester V:
CEP3: Problem solving module-II

Student shall be assigned as ‘Teaching Assistant’ to Semester III courses.

Student shall maintain regular contact with the semester V course teachers (once in a week per course). Teacher shall maintain the attendance of the student. Teacher shall mentor student and give assignments with GATE level problems to solve. At least TWO assignments per course shall be submitted by the student.

After End Semester Examination student shall appear for the Model Test paper based on the pattern of the actual GATE Examination. This paper shall be based on the contents of Semester-V courses. The negative marking is applicable as per GATE pattern.

The student shall obtain minimum 10 marks to continue registration in CEP module for next semester onwards.

Semester VI:
CEP4: Problem solving module –III

Student shall be assigned as ‘Teaching Assistant’ to Semester IV courses.

Self-Learning: Numerical Ability and Verbal Ability

Student shall maintain regular contact with the semester VI course teachers (once in a week per course). Teacher shall maintain the attendance of the student. Teacher shall mentor student and give assignments with GATE level problems to solve. At least TWO assignments per course shall be submitted by the student.

After End Semester Examination student shall appear for the Model Test paper based on the pattern of the actual GATE Examination. This paper shall be based on the contents of Semester

VI courses and self-learning module on numerical ability and verbal ability. The negative marking is applicable as per GATE pattern.

The student shall obtain minimum 10 marks to continue registration in CEP module for next semester onwards.

Semester VII:

CEP5: Problem solving module-IV

Student shall be assigned as 'Teaching Assistant' to Semester V courses.

Self-Learning: Contents not covered in any semester of study

Student shall maintain regular contact with the semester VII course teachers (once in a week per course). Teacher shall maintain the attendance of the student. Teacher shall mentor student and give assignments with GATE level problems to solve.

At least TWO assignments per course shall be submitted by the student.

After End Semester Examination student shall appear for the Model Test paper based on the pattern of the actual GATE Examination. This paper shall be based on the contents of entire syllabus of GATE Examination. The negative marking is applicable as per GATE pattern.

The student shall obtain minimum 10 marks to continue registration in CEP module for next semester onwards.

Semester VIII:

CEP6: Problem solving module-V

At the start of the semester student shall appear for the TWO Model Test papers based on the pattern of the actual GATE Examination. This paper shall be based on the contents of entire syllabus of GATE Examination. The negative marking is applicable as per GATE pattern.

Student shall submit 'Valid GATE Score Card' after declaration of GATE result.

Mapping with Syllabus for GATE Exam (Semester-wise)

Semester - I
Engineering Mathematics-I : Linear Algebra: Matrices, determinants, system of linear equations, Calculus: Maxima and minima.
Semester-II
Engineering mathematics –II : Integration.
Programming Methodology and Data Structures : Programming in C. Recursion. Arrays, stacks, queues, linked lists.
Semester-III
Advanced Data Structures : linked lists, trees, binary search trees, binary heaps, graphs, Graph search, hashing.
Digital Logic Design and Analysis : Number representations, Combinational and sequential circuits. Minimization.
Discrete Structures and Graph Theory : Boolean algebra, Propositional and first order logic. Sets, relations, functions, partial orders and lattices. Groups. Graphs: connectivity, matching, coloring. recurrence relations, generating functions.
Semester-IV
Applied Mathematics-II : Linear Algebra: eigenvalues and eigenvectors Matrices, determinants, Probability: Random variables, poisson and binomial distributions. and Bayes theorem.
Analysis of Algorithms : Searching, sorting, Asymptotic worst case time and space complexity. Algorithm design techniques: greedy, dynamic programming and divide and conquer, minimum spanning trees, shortest paths.
Database Management Systems : ER-model. Relational model: relational algebra, tuple calculus, SQL. Integrity constraints, normal forms. . Transactions and concurrency control.
Operating Systems : Processes, threads, inter-process communication, concurrency and synchronization. Deadlock. CPU scheduling. Memory management. File systems.
Computer Organization and Architecture : computer arithmetic (fixed and floating point), ALU, data path and control unit. Instruction pipelining. Memory hierarchy: cache, main memory and secondary storage; I/O interface (interrupt and DMA mode), virtual memory
Semester V:
Computer Networks : Concept of layering. LAN technologies (Ethernet). Flow and error control techniques, switching. IPv4/IPv6, routers and routing algorithms (distance vector, link state). TCP/UDP and sockets, congestion control. Application layer protocols (DNS, SMTP, POP, FTP, HTTP). Basics of Wi-Fi. Network security: authentication, basics of public key and private key cryptography, digital signatures and certificates, firewalls.
Theory of Computer Science : Regular expressions and finite automata. Context-free grammars and push-down automata. Regular and context-free languages, pumping lemma. Turing machines and undecidability.

Microprocessor :- Machine instructions and addressing modes.
Semester VI:
System Programming and Compiler Construction: Lexical analysis, parsing, syntax-directed translation. Runtime environments. Intermediate code generation.
Covered in previous standards:-
Mean, median, mode and standard deviation. Conditional probability, Limits, continuity and differentiability
Not covered in any Semester
LU decomposition, Mean value theorem, Combinatorics: counting, File organization, indexing (e.g., B and B+ trees)

Self Learning Module: General Aptitude

I. Verbal Ability

1. Grammar
2. Nouns, Pronouns, Articles
3. Verbs, Auxiliaries, Modals
4. Adjectives, Adverbs
5. Prepositions, Conjunctions
6. Active/ Passive Voice, Direct/ Indirect Speech
7. Verbal phrases
8. Sentence Completion
9. Vocabulary
10. Synonyms
11. Antonyms
12. Analogy
13. Reverse Analogy
14. Verbal Reasoning
15. Critical Reasoning
16. Logical Reasoning

II. Numerical Ability

I. Quantitative Aptitude:

1. Simple Equations
2. Ratio-proportion-variation
3. Numbers
4. Percentage, Profit and Loss
5. Simple Interest and Compound Interest
6. Average, mixtures and Alligations

7. Time and Work
8. Time and Distance
9. Indices, Surds, Logarithms
10. Quadratic Equations
11. Inequalities
12. Progressions
13. Permutations and Combinations
14. Data Interpretation

II. Reasoning

1. Number and Letter Series
2. Analogies
3. Odd man out (Classification)
4. Coding and Decoding
5. Blood relations
6. Venn Diagrams
7. Seating Arrangements
8. Puzzles
9. Clocks and Calendars
