## INDIAN AIR FORCE DAY

The Air Force Day was officially started celebrating at 8<sup>th</sup> of October in the year 1932 as an auxiliary air force of Indian Empire. The Indian Air Force, air arm of the Indian armed forces, has its prime responsibility of securing the Indian airspace as well as to carry out the aerial warfare during any clash.

The India Air Force has been engaged in the four wars with the Pakistan and one with People's Republic of China after its independence. The operations carried out by it are Operation Meghdoot, Operation Vijay – the invasion of Goa, Operation Cactus and Operation Poomalai. It has also been involved in the United Nations peacekeeping missions. The President of the country serves to the India Air Force as a Commander-in-Chief.

The Indian Air Force has the strength of about 170,000 personnel and more than 1,400 aircraft and considered as one of the leading air forces of world. It has the responsibility to safeguard the Indian Territory from all risks, provide help during natural calamities to the affected areas.

World Mental Health Day is observed on 10 October every year, with the overall objective of raising awareness of mental health issues around the world and mobilizing efforts in support of mental health.

The Day provides an opportunity for all stakeholders working on mental health issues to talk about their work, and what more needs to be done to make mental health care a reality for people worldwide.

## Reference Management Tools:

Reference Management Tools help scholars to create and manage their lists of references for research project. Most tools are designed to organize citations into specific formats for the preparation of bibliographies. Many research tools provide ways to download references into reference management tools.

Following are some of the examples of open source Reference Manager Tools

1. **Mendeley:** Mendeley is a desktop and web program for managing and sharing research papers, discovering research data and collaborating online. It combines Mendeley Desktop, a PDF and reference management application (available for Windows, OS X and Linux) and Mendeley for Android and iOS, with Mendeley Web, an online social network for researchers.

Mendeley requires the user to store all basic citation data on its servers—storing copies of documents is at the user's discretion. Upon registration, Mendeley provides the user with 2 GB of free web storage space, which is upgradeable at a cost.

2. **Zotero:** Zotero is free and open-source reference management software to manage bibliographic data and related research materials (such as PDF files). Notable features include web browser integration, online syncing, generation of in-text citations, footnotes and bibliographies, as well as integration with the word processors Microsoft Word, LibreOffice, OpenOffice.org Writer and NeoOffice. It is produced by the Center for History and New Media at George Mason University (GMU).
