World Disability Day – 3rd December

World Disability Day

Disability Day, or the International Day of People with Disability, is a day that has been promoted by the United Nations since 1992. The aim of Disability Day is to encourage a better understanding of people affected by a disability, together with helping to make people more aware of the rights, dignity and welfare of disabled people, as well as raise awareness about the benefits of integrating disabled persons into every aspect of life, from economic, to political, to social and cultural. Disability Day is not concerned exclusively with either mental or physical disabilities, but rather encompasses all known disabilities, from Autism to Down Syndrome to Multiple Sclerosis.

HUMAN RIGHTS DAY

Human Rights Day was established in 1948, and ever since that auspicious day it has stood as the first major stride forward in ensuring that the rights of every human across the globe are protected. From the most basic human needs such as food, shelter, and water, all the way up to access to free and uncensored information, such has been the goals and ambitions laid out that day.

The Universal Declaration of Human Rights (UDHR) was a shout across the world by the leading countries in the world, stating loud and clear that no matter where we live, what we believe, or how we love, we are each individually deserving of the most basic fundaments of human needs. Every year Human Rights Day marks conferences around the world dedicated to ensuring that these ideals are pursued, and that the basic Human Rights of every person is made a priority in the global theater.
