## Preamble:

Concept of academic autonomy is based on the argument that Institutions can undertake the work expected of them by all stakeholders such as Students , Parents , University , Industry , Society in general, only if they have freedom of choice and action. We at S.P.I.T. would like to believe that this freedom of choice and action as far as academics is concerned will make us more Proactive in our offerings.

An academic autonomy is as good as its Curricula and execution of it is as well as its faculty. S.P.I.T. is confident of succeeding on both the fronts.

In the first offering we have tried to pro-actively bridge the ever discussed “Industry-academic gap” by way of our SCOPE program. The issue about sensitizing students to social needs is being addressed by special activity based courses. Liberal arts courses have been introduced to enhance functionality of both sides of brain. In all this the professional core has not been overlooked. Thus the curricula are designed to achieve multi dimensional outcomes.

The evaluation mechanism is tuned for assessing the attainment of the designed outcomes and is designed as a fair mechanism.

As our learning cycle begins from July 2017, I wish to place on record that entire S.P.I.T. staff and faculty will work with singular focus and commitment towards the success of this endeavour.

**Dr. Prachi Gharpure**  
**Principal, S.P.I.T.**

## From the Desk of Dean Academics

Greetings and congratulations to all the students, teaching and supporting staff of Sardar Patel Institute of Technology for getting autonomous status to the institute from the year 2017-18. We look towards autonomy as a great opportunity to design and implement curriculum sensitive to needs of Indian Society and Industries.

In the proposed curriculum we have made an attempt to provide opportunity for students to develop themselves as competent engineering graduates with knowledge, skill and ethical behavior required for global career. Curriculum is designed to provide multiple learning opportunities for students to acquire and demonstrate competencies for rewarding careers. The curriculum model is outcome based that focuses on learning by doing. This is achieved through activity based learning, minor projects, problem solving and innovative styles of pedagogy. Various steps are taken to transform teaching-learning process to make learning a joyful experience for students. Special laboratory based courses are introduced to give more practical exposure to the students.

To create socially responsible citizen curriculum offers courses like Constitution of India, Environmental Studies and Human Health Systems Approach. Also various activity based learning modules like 'Building Automation, Fire Safety and Electronic Security', 'Occupational Safety & Legal Studies for Engineers', 'Technical Presentation Skills', 'Technical Paper and Patent Drafting', 'Engineering Solution for Environmental Problems' and 'Financial Planning, Taxation Policies and Investment' are introduced. For overall development of the learner, various elective courses like Yoga Vidya, Music Appreciation, Dramatics, Industrial and Organizational Psychology, Law for Engineers, French Language, German Language etc. are introduced. To encourage interdisciplinary studies institute level Open Elective courses are offered.

One of the special feature of this curriculum is Skill development programme called SCOPE (Skill Certification for Outcome-Based Professional Education) planned to enhance employability, innovation and research culture in the institute. Every department is offering six domain specific tracks, each track containing six courses. Student will have an opportunity to enroll for more than 140 courses in any of the department of his choice. Some of the courses under SCOPE will be delivered in co-ordination with industries.

We believe that this curriculum will raise the bar of academic standards with the active involvement and cooperation from students, academic and administrative units. Faculty of S.P.I.T. deserves a special appreciation for their relentless efforts in designing curriculum and assessment instruments which will bring transformation in the quality and transparency in assessment of learners.

Looking forward for your active cooperation and constructive feedback to create vibrant and joyful learning environment at Sardar Patel Institute of Technology.

**Dr. Surendra Singh Rathod**  
**Professor and Dean Academics**

## Message from Head of the Department

The Computer Engineering is organized and administrated in accordance to industry to provide a professional atmosphere for students to enrich the discipline of computer. In particular, we aim, to produce highly qualified and all round graduates not only possessing fundamental knowledge of computing and technology but also to provide leadership and service to the community. The objective of the syllabus is to train students for reading, innovative thinking, and presentation habits. The Department is offering a well-balanced undergraduate computer engineering program designed considering technological, scientific, and humanistic study. B.Tech. programme is a 180-credit degree programme, which is spread over 8 semesters for a full-time student.

The syllabus is directional in wide scope and allows the much desired flexibility to keep speed with the ever growing body of knowledge and explorations in ICT enabled industries considering human side of enterprise. The course structures are carefully designed so that students get superiority in dealing with diverse situations when they step into the corporate world. The Skill Certification for Outcome-based Professional Education (SCOPE) Courses which are framed with respect to Industry expectations in mind surely helps students to develop their skills required.

Sardar Patel Institute of Technology's has taken a lead in incorporating philosophy of Choice Based Education in the process of curriculum development. This program subscribes to the view that a bachelor degree can be used as a stepping stone for master degree and research as well. We give you best wishes to take this syllabus and travel the path of success.

**Dr. D. R. Kalbande**  
**Head of Computer Engineering Department**

<b>Pre-requisite Course Codes</b>	-	
At end of successful completion of this course, student will be able to		
<b>Course Outcomes</b>	CO1	Understand the concept of DT Signal and perform signal manipulation
	CO2	Perform analysis of DT system in time domain
	CO3	Develop FFT flow-graph and Fast DSP Algorithms.
	CO4	Design DSP System for Real Time Signal Processing

Module No.	Topics	Ref.	Hrs.
1	<b>Discrete Time Signal</b> Introduction to Digital Signal Processing, Discrete Time Signals, Sampling and Reconstruction, Standard DT Signals, Concept of Digital Frequency, Representation of DT signal using Standard DT Signals, Signal Manipulations (shifting, addition, subtraction, multiplication), Classification of Signals, Linear Convolution formulation (without mathematical proof), Circular Convolution formulation (without mathematical proof), Matrix Representation of Circular Convolution, Linear by Circular Convolution. Auto and Cross Correlation formula evaluation	1,3, 4,8	12
2	<b>Discrete Time System</b> Introduction to Discrete Time System, Classification of DT Systems (Linear/Non Linear, Causal/Non Causal, Time Invariant/Time Variant Systems, Stable/ Unstable), BIBO Time Domain Stability Criteria. LTI system, Concept of Impulse Response and Step Response, Concept of IIR System and FIR System, Output of IIR and FIR DT system using Time Domain Linear Convolution formula Method.	1,2, 3,4, 7	08
3	<b>Discrete Fourier Transform</b> Introduction to DTFT, DFT, Relation between DFT and DTFT, Properties of DFT without mathematical proof (Scaling and Linearity, Periodicity, Time Shift and Frequency Shift, Time Reversal, Convolution Property and Parseval's Energy Theorem). DFT computation using DFT properties, Transfer function of DT System in frequency domain using DFT. Linear and Circular Convolution using DFT. Response of FIR system calculation in frequency domain using DFT.	1,3, 8	08

		Examination Scheme						
		ISE		MSE		ESE		
		10	30	100 (60% Weightage)				

<b>Pre-requisite Course Codes</b>		-
At end of successful completion of this course, student will be able to		
<b>Course Outcomes</b>	<b>CO1</b>	Visualize the architectural concepts in development of large, practical software-intensive applications.
	<b>CO2</b>	Rather than focusing on one method, notation, tool, or process, this new course widely surveys software architecture techniques, enabling us to choose the right tool for the job at hand.

Module No.	Unit No.	Topics	Ref.	Hrs.
1	1	<b>Basic Concepts:</b>	1,2,3	3
	1.1	Concepts of Software Architecture		
	1.2	Models.		
	1.3	Processes.		
	1.4	Stakeholders		
2	2	<b>Designing Architectures:</b>	1,2,3	2
	2.1	The Design Process.		
	2.2	Architectural Conception.		
	2.3	Refined Experience in Action: Styles and Architectural Patterns.		
	2.4	Architectural Conception in Absence of Experience.		
3	3	Connectors	1,2,3	6
	3.1	Connectors in Action: A Motivating Example.		
	3.2	Connector Foundations.		
	3.3	Connector Roles.		
	3.4	Connector Types and Their Variation Dimensions.		
	3.5	Example Connectors		
4	4	<b>Modeling</b>	1,2,3	4
	4.1	Modeling Concepts.		
	4.2	Ambiguity, Accuracy, and Precision.		
	4.3	Complex Modeling: Mixed Content and Multiple Views.

<b>Pre-requisite Course Codes</b>	Programming Languages (C, C++, Java) Basic Mathematics	
At end of successful completion of this course, student will be able to		
<b>Course Outcomes</b>	CO1	Identify the various characteristics of soft computing techniques.
	CO2	Apply the supervised and unsupervised learning algorithm for real world applications.
	CO3	Apply & design fuzzy controller system.
	CO4	Appreciate the importance of optimizations and its use in computer engineering fields and other domains.
	CO5	Understand the efficiency of a hybrid system and how Neural Network and fuzzy logic can be hybridized to form a Neuro-fuzzy network and its various applications.

Module No.	Topics	Ref.	Hrs.
1	<b>Introduction to Soft Computing</b> Soft computing Constituents, Characteristics of NeuroComputing and Soft Computing, Difference between HardComputing and Soft Computing, Concepts of Learning and Adaptation.	1-9	04
2	<b>Neural Networks</b> Basics of Neural Networks: Introduction to Neural Networks, Biological Neural Networks, McCulloch Pitt model, Supervised Learning algorithms: Perceptron (Single Layer, Multilayer), Linear separability, Delta learning rule, Back Propagation algorithm, Un-Supervised Learning algorithms: Winner take all, Self- Organizing Maps, Learning Vector Quantization.	1-9	14
3	<b>Fuzzy Set Theory</b> Classical Sets and Fuzzy Sets, Classical Relations and Fuzzy Relations, Properties of membership function, Fuzzy extension principle, Fuzzy Systems- fuzzification, defuzzification and fuzzy controllers.	1-9	14
4	<b>Hybrid system</b> Introduction to Hybrid Systems, Adaptive Neuro Fuzzy Inference System (ANFIS).	1-9	04
5	<b>Introduction to Optimization Techniques</b>		06

<b>Pre-requisite Course Codes</b>	CPE7025(Soft Computing)
-----------------------------------	-------------------------

At end of successful completion of this course, student will be able to

Course Outcomes	CO1	Differentiate various Transfer Functions.
	CO2	Apply the supervised and unsupervised learning algorithm.
	CO3	Apply & design fuzzy controller system.
	CO4	Apply Genetic algorithm for basic optimization problem.

Exp. No.	Experiment Details	Ref.	Marks								
1	To implement Mc-Culloch Pitts Model.	1-5	5								
2	To implement Transfer/Activation Functions. i) A symmetric hard limit transfer function. ii) A Binary step activation function. iii) A Bipolar step activation function. iv) A saturating linear transfer function. v) A hyperbolic tangent sigmoid (tansig) transfer function. vi) A log-sigmoid transfer function	1-5	5								
3	To implement Basic Neural Network learning rules.  PROBLEM TO DISTINGUISH BETWEEN APPLES AND ORANGES  A produce dealer has a warehouse that store a variety of fruits & vegetables. When fruit is brought to the warehouse, a various types of fruits may be mixed together. The dealer wants a machine that will sort the fruit according to type. There is a conveyer belt on which the fruit is loaded. This conveyer passes through a set of sensors, which measure three properties of fruits :shape, texture and weight. Bias= < Any Value>	1-5	5								
	<table border="1"> <thead> <tr> <th>Type of sensor</th> <th>Output of sensor</th> <th>Condition</th> </tr> </thead> <tbody> <tr> <td rowspan="2">Shape sensor</td> <td>1</td> <td>if fruit is approx. round</td> </tr> <tr> <td>0</td> <td>if fruit is elliptical.</td> </tr> </tbody> </table>	Type of sensor	Output of sensor	Condition	Shape sensor	1	if fruit is approx. round	0	if fruit is elliptical.		
Type of sensor	Output of sensor	Condition									
Shape sensor	1	if fruit is approx. round									
	0	if fruit is elliptical.

## Guidelines for Project

- Students should do literature survey/visit industry/analyze current trends and identify the problem for Project and finalize in consultation with Guide/Supervisor. Students should use multiple literatures and understand the problem.
- Students should attempt solution to the problem by experimental/simulation methods.
- The solution to be validated with proper justification and report to be compiled in standard format.
  
- Guidelines for Assessment of Project I
  - Project I should be assessed based on following points Quality of problem selected
  - Clarity of Problem definition and Feasibility of problem solution Relevance to the specialization
  - Clarity of objective and scope
  - Breadth and depth of literature survey
  
- Project I should be assessed through a presentation by the student project group to a panel of Internal examiners appointed by the Head of the Department/Institute of respective Programme.

CPC801	Data Warehouse and Mining	4	-	--	4	-	--	4
		Examination Scheme						
		ISE		MSE		ESE		
		10		30		100 (60% Weightage)		

<b>Pre-requisite Course Codes</b>	CSC404 (Database Management System) CPC603 (Distributed Database)
At end of successful completion of this course, student will be able to	
<b>Course Outcomes</b>	CO1 Discuss the need of data warehouse and the concepts of data warehousing.
	CO2 Describe the ETL process and illustrate the OLAP operations
	CO3 Express the concepts of data mining, data exploration , preprocessing
	CO4 Apply algorithms in data mining and data warehousing; assess the strengths and weaknesses of the algorithms, identify the application area of algorithms

Module No.	Topics	Ref.	Hrs.
1	<b>Introduction to Data Warehousing</b> The Need for Data Warehousing; Increasing Demand for Strategic Information; Inability of Past Decision Support System; Operational V/s Decisional Support System; Data Warehouse Defined; Benefits of Data Warehousing; Features of a Data Warehouse; The Information Flow Mechanism; Role of Metadata; Classification of Metadata; Data Warehouse Architecture; Different Types of Architecture; Data Warehouse and Data Marts; Data Warehousing Design Strategies.	1,3	04
2	<b>Dimensional Modeling</b> Data Warehouse Modeling Vs Operational Database Modeling; Dimensional Model Vs ER Model; Features of a Good Dimensional Model; The Star Schema; How Does a Query Execute? The Snowflake Schema; Fact Tables and Dimension Tables; The Factless Fact Table; Updates To Dimension Tables: Slowly Changing Dimensions, Type 1 Changes, Type 2 Changes, Type 3 Changes, Large Dimension Tables, Rapidly Changing or Large Slowly Changing Dimensions, Junk Dimensions, Keys in the Data Warehouse Schema, Primary Keys, Surrogate Keys & Foreign Keys; Aggregate Tables; Fact Constellation Schema or Families of Star.	1,3	06
3	<b>ETL Process</b> Challenges in ETL Functions; Data Extraction; Identification of	1,2,3	06

# Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India

(Autonomous Institute Affiliated to University of Mumbai)

	DataSources; Extracting Data: Immediate Data Extraction, Deferred DataExtraction; Data Transformation: Tasks Involved in Data Transformation,Data Loading: Techniques of Data Loading, Loading the Fact Tables andDimension Tables Data Quality; Issues in Data Cleansing.		
4	<b>Online Analytical Processing (OLAP)</b> Need for Online Analytical Processing; OLTP V/s OLAP; OLAP and Multidimensional Analysis; Hypercubes; OLAP Operations inMultidimensional Data Model;OLAP Models: MOLAP, ROLAP, HOLAP,DOLAP;	1,3,6,9	04
5	<b>Introduction to data mining</b> What is Data Mining; Knowledge Discovery in Database (KDD), What canbe Data to be Mined, Related Concept to Data Mining, Data MiningTechnique, Application and Issues in Data Mining	1,3,4,5	02
6	<b>Data Exploration</b> Types of Attributes; Statistical Description of Data; Data Visualization;Measuring similarity and dissimilarity.	1,7	02
7	<b>Data Preprocessing</b> Why Preprocessing? Data Cleaning; Data Integration; Data Reduction: Attribute subset selection, Histograms, Clustering and Sampling; Data Transformation & Data Discretization: Normalization, Binning, Histogram Analysis and Concept hierarchy generation.	1,8	04
8	<b>Classification</b> Basic Concepts; Classification methods:Decision Tree Induction: Attribute Selection Measures, Tree pruning, Bayesian Classification: Naïve Bayes' Classifier, Prediction: Structure of regression models; Simple linear regression, Multiple linear regression, Model Evaluation & Selection: Accuracy and Error measures, Holdout,Random Sampling, Cross Validation, Bootstrap; Comparing Classifierperformance using ROC Curves, Combining Classifiers: Bagging, Boosting, Random Forests.	1,4,8	06
9	<b>Clustering</b> What is clustering? Types of data, Partitioning Methods (K-Means, K-Medoids) Hierarchical Methods(Agglomerative, Divisive, BRICH),Density-Based Methods ( DBSCAN, OPTICS)	1,4,8	06
10	<b>Mining Frequent Pattern and Association Rule</b> Market Basket Analysis, Frequent Itemsets, Closed Itemsets, andAssociation Rules; Frequent Pattern Mining, Efficient and Scalable FrequentItemset Mining Methods, The Apriori Algorithm for finding FrequentItemsets Using Candidate Generation, Generating Association Rules fromFrequentItemsets, Improving the Efficiency of Apriori, A pattern growthapproach for mining Frequent Itemsets; Mining Frequent itemsetsusingvertical data formats; Mining	1,4	08

# Sardar Patel Institute of Technology

		40	-	20	60				

<b>Pre-requisite Course Codes</b>	CPC803(Parallel and Distributed Systems)	
At end of successful completion of this course, student will be able to		
<b>Course Outcomes</b>	CO1	The student gains clear understanding of fundamental principles of Parallel and Distributed Systems.
	CO2	The student understands the message communication, remote procedure call and Remote method invocation (RPC and RMI) along with group communication.
	CO3	Emphasis is on developing applications using current distributed computing technologies like EJB, CORBA.
	CO4	Analyze different token based and non-token based algorithms for the design and development of distributed systems subject to specific design and performance constraints.

Exp. No.	Experiment Details	Ref.	Marks
1	A program to implement simple calculator operations like addition, subtraction, multiplication and division using RPC.	2,3	5
2	Write a program to show the object communication using RMI. a)RMI based application program to display current date and time. b)RMI based application program that converts digits to words, e.g. 123 will be converted to one two three.	2,3	5
3	To implement CORBA mechanism by java program.	3	5
4	Implement Load Balancing Program in Java.	1	5
5	Show the implementation of logical lamport clock synchronization algorithm.	1	5
6	Implement Suzuki Kasami Token Based Algorithm.	1	5
7	Case Study on Distributed File System- AFS, NFS and HDFS.	2	5
8	Mini Project		5
<b>Total Marks</b>			<b>40</b>

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned				
		L	T	P	L	T	P	Total	
CPEL8031	Elective -III Machine Learning Lab	--	--	2	--	--	1	1	
		Examination Scheme							
		ISE		ESE		Total			
				Practical	Oral				
40		-		20		60			

<b>Pre-requisite Course Codes</b>	CPE8031(Machine Learning)
-----------------------------------	---------------------------

At end of successful completion of this course, student will be able to

Course Outcomes	CO1	Implement Regression Methods
	CO2	Implement Classification
	CO3	Implement Clustering
	CO4	Apply the Dimensionality Reduction Techniques

Exp. No.	Experiment Details	Ref.	Marks
1	To implement Linear /Logistic Regression	1-7	5
2	To implement Single layer Perceptron Learning algorithm	1-7	5
3	To implement ID3	1-7	5
4	To implement Support Vector Machine	1-7	5
5	To implement Bayesian Classification	1-7	5
6	To implement K-nearest Neighbor	1-7	5
7	To implement K-means Clustering	1-7	5
8	To implement Agglomerative Clustering	1-7	5
<b>Total Marks</b>			<b>40</b>

		L	T	P	L	T	P	Total	
CPEL8032	Elective-III Embedded Systems Lab	--	--	2	--	--	1	1	
		Examination Scheme							Total
		ISE		ESE			Total		
				Practical	Oral				
		40	-		20		60		

<b>Pre-requisite Course Codes</b>	CPE8032(Embedded Systems)	
At end of successful completion of this course, student will be able to		
<b>Course Outcomes</b>	CO1	Design microcontroller based embedded systems for various applications.
	CO2	Produce efficient code for embedded systems
	CO3	Define the properties of a real-time operating system.
	CO4	Develop drivers for external peripheral devices as per requirement.

Exp. No.	Experiment Details	Ref.	Marks
1	To study the In-Circuit Emulator (ICE) and In-Circuit Debugger (ICD) troubleshooting tools.	1,2	5
2	Interfacing of LCD module with ARM Processors.	2,3	5
3	Program to interface stepper motor.		5
4	To develop Device Driver ( Drivers for CAN, Drivers for USB, Drivers for Ethernet).	2,4	5
5	To study Real Time Operating System (RTOS).	2,3	5
6	Converting existing Windows and Linux as RTOS by configuring QNX Neutrino (using Virtual Machine).	1,4	5
7	Implement a semaphore for any given task switching using RTOS on microcontroller board.	2,5	5
8	Program for exploration of (process creation, Thread creation)using Embedded Real Time Linux.	5,6	5
<b>Total Marks</b>			<b>40</b>

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned				
		L	T	P	L	T	P	Total	
CPEL8033	Elective-III Adhoc Wireless Networks Lab	--	--	2	--	--	1	1	
		Examination Scheme							Total
		ISE		ESE			Total		
				Practical	Oral				
		40	-		20		60		

<b>Pre-requisite Course Codes</b>	CPE8033(Adhoc Wireless Networks)		
At end of successful completion of this course, student will be able to			
<b>Course Outcomes</b>	CO1	Describe the unique issues in ad-hoc/sensor networks.	
	CO2	Describe current technology trends for the implementation and deployment of wireless ad-hoc networks.	
	CO3	Discuss the challenges in designing MAC, routing and transport protocols for wireless ad-hoc networks.	
	CO4	Discuss the challenges in designing routing and transport protocols for wireless Ad-hoc networks.	

Exp. No.	Experiment Details	Ref.	Marks
1	Installation of NS2 in Ubuntu 12.04 Linux.	1,4	5
2	Build and exchange data in simple infrastructure and Adhoc network by using personal computer and Android based mobile.	1,3	5
3	Develop sample wireless network in which a. Implement AODV and AOMDV protocol. b. Calculate the time to receive reply from the receiver using NS2. C. Generate graphs which show the transmission time for packet.	1,3	5
4	Implement wireless network. Capture data frame and identify fields using NS2.	2,4	5
5	Configure Wireless Access Point (WAP) and build different networks.	3,4	5
6	Implement Mobile device as a wireless access point.	1,4	5
7	Communicate between two different networks which has following specifications: a. One network has Class A network with "Tora protocol" b. Second has Class B network "AODV protocol"	2,3	5
8	Case study on Security in wireless Ad hoc wireless Networks.	1,3	5

CPEL8035	Elective-III Big Data Analytics Lab	--	--	2	--	--	1	1
		Examination Scheme						
		ISE		ESE		Total		
				Practical	Oral			
		40	--	20	60			

<b>Pre-requisite Course Codes</b>	CPE8035(Big Data Analytics)	
At end of successful completion of this course, student will be able to		
<b>Course Outcomes</b>	CO1	Identify challenges in big data management and inadequacy of existing technology to analyze big data.
	CO2	Apply scalable algorithms based on Hadoop and Map Reduce to perform Big Data Analytics..
	CO3	Apply NoSQL tools to solve big data problems.
	CO4	Use stream data model to provide real time analysis of big data.
	CO5	Discover information from social network graphs.

Exp. No.	Experiment Details	Ref.	Marks
1	Study of Hadoop Ecosystem and execute word count program.	1,2	5
2	Mapreduce program on Hadoop.	1,2	5
3	Programming in NoSQL.	1,2,3	5
4	Use Pig scripting to solve Big Data problem.	1,4,5	5
5	Implement a Frequent Itemset algorithm using Map Reduce.	1,2,3	5
6	Implement a Clustering algorithm using Map Reduce.	1,2,3	5
7	Implement a Data streaming algorithm using Map Reduce.	1,2,3	5
8	Mini Project. One real life large data application to be implemented (Use standard Datasets available on the web)	1,2,3	5

## Guidelines for Assessment of Project II

- Project II should be assessed based on following points
  - Quality of problem selected
  - Clarity of Problem definition and Feasibility of problem solution
  - Relevance to the specialization / Industrial trends
  - Clarity of objective and scope
  - Quality of work attempted
  - Validation of results
  - Quality of Written and Oral Presentation
- Report should be prepared as per the guidelines issued by the University of Mumbai.
- Project II should be assessed through a presentation by the student project group to a panel of Internal and External Examiners approved by the University of Mumbai
- Students should be motivated to publish a paper based on the work in Conferences/students competitions
