

Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
(Autonomous Institute Affiliated to University of Mumbai)

Revision: SPIT-4-17

Bachelor of Engineering/Technology (B.E./B.Tech)
in
Information Technology

Final Year Engineering
(Sem. VII and Sem. VIII)
Effective from Academic Year 2017 -18

Principal
Sardar Patel Institute of Technology
Bhavans Andheri Campus
Munshi Nagar, Andheri (West)
Mumbai - 400 058.

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

Preamble:

Concept of academic autonomy is based on the argument that Institutions can undertake the work expected of them by all stakeholders such as Students , Parents , University , Industry , Society in general, only if they have freedom of choice and action.

We at S.P.I.T. would like to believe that this freedom of choice and action as far as academics is concerned will make us more Proactive in our offerings.

An academic autonomy is as good as its Curricula and execution of it is as well as its faculty. S.P.I.T. is confident of succeeding on both the fronts.

In the first offering we have tried to pro-actively bridge the ever discussed “Industry-academic gap” by way of our SCOPE program. The issue about sensitizing students to social needs is being addressed by special activity based courses. Liberal arts courses have been introduced to enhance functionality of both sides of brain. In all this the professional core has not been overlooked. Thus the curricula are designed to achieve multi dimensional outcomes.

The evaluation mechanism is tuned for assessing the attainment of the designed outcomes and is designed as a fair mechanism.

As our learning cycle begins from July 2017, I wish to place on record that entire S.P.I.T. staff and faculty will work with singular focus and commitment towards the success of this endeavour.

Dr. Prachi Gharpure
Principal, S.P.I.T.

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

From the Desk of Dean Academics

Greetings and congratulations to all the students, teaching and supporting staff of Sardar Patel Institute of Technology for getting autonomous status to the institute from the year 2017-18. We look towards autonomy as a great opportunity to design and implement curriculum sensitive to needs of Indian Society and Industries.

In the proposed curriculum we have made an attempt to provide opportunity for students to develop themselves as competent engineering graduates with knowledge, skill and ethical behavior required for global career. Curriculum is designed to provide multiple learning opportunities for students to acquire and demonstrate competencies for rewarding careers. The curriculum model is outcome based that focuses on learning by doing. This is achieved through activity based learning, minor projects, problem solving and innovative styles of pedagogy. Various steps are taken to transform teaching-learning process to make learning a joyful experience for students. Special laboratory based courses are introduced to give more practical exposure to the students.

To create socially responsible citizen curriculum offers courses like Constitution of India, Environmental Studies and Human Health Systems Approach. Also various activity based learning modules like 'Building Automation, Fire Safety and Electronic Security', 'Occupational Safety & Legal Studies for Engineers', 'Technical Presentation Skills', 'Technical Paper and Patent Drafting', 'Engineering Solution for Environmental Problems' and 'Financial Planning, Taxation Policies and Investment' are introduced. For overall development of the learner, various elective courses like Yoga Vidya, Music Appreciation, Dramatics, Industrial and Organizational Psychology, Law for Engineers, French Language, German Language etc. are introduced. To encourage interdisciplinary studies institute level Open Elective courses are offered.

One of the special feature of this curriculum is Skill development programme called SCOPE (Skill Certification for Outcome-Based Professional Education) planned to enhance employability, innovation and research culture in the institute. Every department is offering six domain specific tracks, each track containing six courses. Student will have an opportunity to enroll for more than 140 courses in any of the department of his choice. Some of the courses under SCOPE will be delivered in co-ordination with industries.

We believe that this curriculum will raise the bar of academic standards with the active involvement and cooperation from students, academic and administrative units. Faculty of S.P.I.T. deserves a special appreciation for their relentless efforts in designing curriculum and assessment instruments which will bring transformation in the quality and transparency in assessment of learners.

Looking forward for your active cooperation and constructive feedback to create vibrant and joyful learning environment at Sardar Patel Institute of Technology.

Dr. Surendra Singh Rathod
Professor and Dean Academics

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

Message from Head of the Department

Change is the only constant thing in the Information Technology arena. In order to adapt to those changes curriculum design needs to be holistic. Curriculum comprising of Basic Science and Engineering, Professional core and electives are essential. Apart from this, knowledge of other multi-disciplinary domains give a broad outlook. Contemporary issues can have innovative solutions if the problems are seen in different perspectives. Hence open elective courses, liberal arts, legal, ethical practices are included as mandatory courses. To bridge the gap between industry and academia skill development courses are introduced.

Information Technology Curriculum follows the five pillars suggested by ACM as basic streams in our Professional core and electives with strong Information Technology foundation courses. Programming, Networking, Human Computer Interaction, Databases and Web systems are the pillars, all under the umbrella of Information assurance and security.

Dr. Radha Shankarmani
Head of Information Technology Department

Sardar Patel Institute of Technology
Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

Scheme for B.E./B.Tech. Information Technology (SEM. VII & VIII)

SEM. VII					
Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits
		L	T	P	Total
ITC701	Software Project Management	4	-	-	4
ITC702	Cloud Computing	3	-	-	3
ITC703	Intelligent System	4	-	-	4
ITC704	Wireless Technology	4	-	-	4
ITC705	Elective-I	4	-	-	4
ITL701	Software Project Management lab	-	-	2	1
ITL702	Cloud Computing lab	-	-	2	1
ITL703	Intelligent System lab	-	-	2	1
ITL704	Wireless Technology lab	-	-	2	1
ITT705	Elective-I	-	-	2	1
ITP706	Project-I	-	-	*	3
	Total	19	-	10	27

*work load of the teacher in semester VII is equivalent to 6 hours/week.

Elective-I (Semester-VII)	
ITC7051	Image processing
ITC7052	Software Architecture
ITC7053	E-Commerce & E- Business
ITC7054	Multimedia Systems
ITC7055	Usability Engineering
ITC7056	Ubiquitous Computing

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
ITC701	Software Project Management	4	-	-	4	-	-	4
		Examination Scheme						
		ISE		MSE		ESE		
		10	30	100 (60%Weightage)				

Pre-requisite Course Codes	TEITC (Software Engineering)	
After successful completion of the course, student will be able to:		
Course Outcomes	CO1	Outline the business case of their project and find MOV
	CO2	Schematize the software project using WBS and network diagrams
	CO3	Measure the effectiveness of project progress by doing earned value analysis
	CO4	Demonstrate the ability to communicate and collaborate with team members in extreme project management style
	CO5	Carry out the cost effectiveness to keep the cost under control

Module No.	Topics	Ref.	Hrs.
1	An overview of IT Project Management: Introduction, the state of IT project management, context of project management, need of project Management, project goals, project life cycle and IT development, information technology project methodology (ITPM), project feasibility, request for proposal (RFP), the business case, project selection and approval, project contracting, PMBOK	1	4
2	Project Integration Management: Introduction, project management process, project integration management, the project charter, project planning framework, the contents of a project plan, the planning process.	1	4
3	Project Scope Management: Introduction, scope planning, project scope definition, project scope verification, scope change control, the Work Breakdown Structure (WBS), the linear responsibility chart.	1, 2	4

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

4	Project Time Management: Introduction, developing the project schedule, Scheduling Charts, logic diagrams and network (AOA, AON), critical path, calendar scheduling and time based network, management schedule reserve, PDM network, PERT, CPM, Resource loading, resource leveling, allocating scarce resources to projects and several projects, Goldratt's critical chain.	1, 2	10
5	Project Cost Management: Cost estimating, Cost escalation, Cost estimating and system development cycle, Cost estimating process, Elements of budgets and estimates, Project cost accounting and MIS, Budgeting using cost accounts, Cost schedules and forecasts.	1, 2	4
6	Project Quality Management: Introduction, Quality tools and philosophies, quality systems, the IT project quality plan.	1	3
7	Project Resource Management: Human Introduction, organization and project planning, the project team, multidisciplinary teams, the project environment, project leadership, ethics in projects, multicultural projects, Role of project manager, IT governance and the project office. Introduction to change, the nature of change, the change management plan, dealing with resistance and conflicts.	1, 2	5
8	Project Communication Management: Introduction, monitoring and controlling the project, the project communications plan, project metric, project control, designing the control system, the plan-monitor control cycle, data collection and reporting, reporting performance and progress, information distribution	1, 2	4
9	Project Risk Management: Basic concepts, Identification, Assessment, Response planning, Management	1	4
10	Project Procurement Management: Introduction, project procurement management, outsourcing.	1, 3	3
11	The Implementation Plan and Project Closure: Introduction, project implementation, administrative closure, project evaluation, project audit.	1	3
Total			48

Pre-requisite Course Codes	TEITC502 (Operating Systems)	
After successful completion of the course, student will be able to:		
Course Outcomes	CO1	Differentiate between different cloud computing techniques.
	CO2	Compare various cloud computing providers/software.
	CO3	Handle open source cloud implementation and administration.
	CO4	Understand risks involved in cloud computing.

Module No.	Topics	Ref.	Hrs.
1	Introduction to Cloud Computing Introduction– Component of CC, Comparing CC with Virtualization, Grids, Utility Computing, client-server model, P to P Computing, Impact of CC on Business, Key Drivers for Cloud Computing, Cloud computing Service delivery model. Cloud Types – Private, Public and Hybrid, when to avoid public cloud, Cloud API	3	02
2	Virtualization Introduction & benefit of Virtualization, Implementation Levels of Virtualization, VMM Design Requirements and Providers, Virtualization at OS level, Middleware support for Virtualization, Virtualization structure/tools and mechanisms: Hypervisor and Xen Architecture, Binary Translation with full Virtualization, Para Virtualization with Compiler Support. Virtualization of CPU, Memory and I/O Devices, Hardware support for Virtualization in Intel x86 processor, CPU Virtualization, Memory Virtualization and I/O Virtualization, Virtualization in Multi core processors.	1, 3	04
3	Cloud computing Services XaaS, IaaS, PaaS- Leveraging PaaS for Productivity Languages for PaaS- DBaaS(Database as a services) – SaaS (Software as a service) – Comparison of various cloud computing providers/ Softwares.	1,3	04

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

4	Cloud Computing and Business Value Key Business Drivers for CC- Cloud computing and out sourcing – Types of Scalability – Security issues in Cloud Computing- time to Market Benefits- Distribution over Internet – Three levels of Business value from Cloud computing.	1,3	04
5	Open Source Cloud Implementation and Administration Eucalyptus and Open Stack Architecture Features –Components – Various mode of operations – Installation and configuration process of both open source – Cloud Administration and Management Task – Creating User Interface (Web Interface) of Private cloud.	1,3	04
6	Cloud Deployment Techniques Factors for Successful Cloud Deployment – Network Requirements – Potential Problem areas in a cloud Network and their Mitigation – Cloud Network Topologies – Automation and Self-service feature in a cloud –cloud performance.	1,3	04
7	Security: Security for Virtualization Platform – Host security for SaaS, 4 PaaS and IaaS – Data Security – Data Security Concerns – Data Confidentiality and Encryption – Data Availability – Data Integrity – Cloud Storage Gateways – Cloud Firewall	1,3	04
8	Architecture for Cloud Application: Cloud Application requirements- Architecture for traditional Vs Cloud Applications- Multi-ties Application Architecture SOA for Cloud applications – Resource oriented SOA – Method –oriented SOA and Event Driven SOA – Parallelization within Cloud Applications – Leveraging In memory Operations for Cloud Application	1,3	04
9	Cloud Programming: Programming Support for Google Apps engine: GFS, Big 4 Tables, Google's NO SQL System, Chubby, Google Distributed Lock Service, Programming Support for Amazon EC2: Amazon S3, EBS and Simple DB etc.	1,4	04
10	Adoption and Use of Cloud Adoption of Public cloud by SMBs- Public Cloud Adoption phase for SMBs- Vendor liability and Management Adoption process of Public clouds by Enterprises – Managed Private clouds Migrating Application to the cloud – Impact of Shared Resources and Multi-Tenancy on cloud Applications – Phases during Migration an Application to An IaaS Cloud	2,3	04
11	Risks of Cloud Computing and Related Costs Risk Assessment and Management – Risk of Vendor Lock-in – Risk of Loss of control over IT services- Risk of Poor Provisioning – Risk of Multi-tenant environment – Risk failure of cloud provider – SLA risk –security, malware and Internet Attacks – Risk with Application Licensing.	1,3	02

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

12	AAA Administration for Clouds AAA model – SSO for Clouds – Authentication management and Authorization management in clouds – Accounting for Resource utilization.	1,3	02
13	Security as a service What can security as service offer- Benefits for Security as a service Issues with Security as a Service- Identity Management as a Service	1,3	02
14	Mobile Cloud Computing Introduction, Definition, Architecture, Benefits, challenges in mobile and at cloud shield	1	02

Course Outcomes	CO1 Analyze, design and implement e-commerce system.
	CO2 Understand the marketing and business strategies.
	CO3 Understand the concept of payment system done in e-commerce.
	CO4 Identify the challenges of e-business and define the e-business structure.

Module No.	Topics	Ref.	Hrs.
1	E – commerce:-Introduction to Ecommerce Definition of e com, different types of e com, Examples of e com E commerce trade cycle, Advantages and disadvantages of e com, Traditional commerce Vs E commerce.	1	02
2	Overview of Hardware and software technologies for E-com Client side programming (Dreamweaver ,Front page), Server side programming(PHP) , Data base connectivity, session tracking, middle ware technologies from e-com perspective and security aspects wrt to ecommerce, integration of web services	1	08
3	Payment System for e-commerce Traditional payment model, Characteristics of payment system, SET Protocol for credit card payment, E-cash, E-check, smart cards.	1,4	08
4	E – Marketing Strategies Value chain , Working of e – market , Transactions at e – market , Strategies for marketing for selling on the web – Advertising supported , advertising subscription mixed model , fee for transaction model Sales and Promotions Strategies for Purchasing and support activities.	2	08
5	E business :-Introduction to e-business Definition of e business, Characteristics, elements of e business, e business roles, Impact of e business, challenges of e business,	4	04

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

	difference between e-business, e commerce.		
6	Developing e-business models E-business structure, Evolution of e –business and its stages , E–business models , Characteristics of Internet based software and e-business solutions.	1,4	03
7	E-business strategies Strategic planning process, SCM , CRM , ERP ,procurement	1,4	07
8	Design and development of an business website a) Building an e-commerce website. :- SDLC, system design ,Issues involved in designing a website , Pre requisites required for designing in–house website, steps involved in web site development ,e-business and web site development solutions, security issues involved and analyzing website traffic--- Case study b) Analysis and design–(Work flow management, process modeling , data modeling), UI design ,use case design , information architecture, security concerns.	4	08
	Total hours of instructions		48

		L	T	P	L	T	P	Total
ITC7056	Ubiquitous Computing	04	-	-	04	-	-	04
		Examination Scheme						
		ISE		MSE		ESE		
		10	30	100 (60% Weightage)				

Pre-requisite Course Codes	
After successful completion of the course, student will be able to:	
Course Outcomes	CO1 Explain objectives and the historical development of the field of ubiquitous computing.
	CO2 Describe fundamentals of sensor technology and sensor networks
	CO3 Apply middleware techniques to implement ubiquitous computing systems
	CO4 Design of new (often embedded) interactive artifacts
	CO5 Compare the usability of alternative design of interactions for specific ubiquitous computing systems

Module No.	Topics	Ref.	Hrs.
1	Introduction to Ubiquitous Computing Definition, Advantage, Application and Scope. Properties of Ubiquitous Computing, Ubiquitous System Environment Interaction. Architectural Design for UbiCom Systems: Smart DEI Model.	1,2	04
2	Smart Devices and Services Introduction to Smart Devices: Users, Mobiles, Cards And Device Networks. Service Architecture Models. Service Provision Life-Cycle. Virtual Machines and Operating Systems Mobile Computers and Communicator Devices.	1,2	08
3	Sensing and Controlling Tagging the Physical World. Sensors and Sensor Networks. Micro Actuation and Sensing: Micro-Electro-Mechanical Systems (MEMS). Embedded Systems and Real-Time Systems. Control Systems for Physical World Tasks. Robots	1,2	08
4	Context-Aware Systems Introduction to Context-Aware Computing, Context-Aware Systems, Context-Aware Applications, Designing and Implementing	2,3	08

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

	Context-Aware Applications, Issues for building Context-Aware Applications.		
5	Human-Computer Interaction User Interfaces and Interaction for Four Widely Used Devices. Hidden UI Via Basic Smart Devices. Hidden UI Via Wearable and Implanted Devices. Human-Centered Design (HCD). User Models: Acquisition and Representation. iHCDesign	3,4	10
6	Ubiquitous Communication Data Networks. Audio Networks. Wireless Data Networks. Universal and Transparent Audio, Video and Alphanumeric Data. Ubiquitous Networks. Network Design Issues. Human Intelligence Versus Machine Intelligence. Challenges in Ubiquitous System, Social Issues: Promise Versus Peril.	3,4	10

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
ITL701	Software Project Management	--	--	2	--	--	1	1
		Examination Scheme						
		ISE		ESE			Total	
				Practical	Oral			
40		-		20		60		

Pre-requisite Course Codes	TEITL601 (Software Engineering Lab) ITC701 (Software project Management)	
After successful completion of the course, student will be able to:		
Course Outcomes	CO1	Demonstrate the factors that lead to the failure of a project-case-study
	CO2	Determine the values/benefits the project if done would bring to the organizations
	CO3	Formulate the sequencing of task (network) to optimize the use of resources
	CO4	Examine the deviation of planned schedule and cost with actual cost and schedule.
	CO5	Make use of a modern tool for communication and collaboration with project team members

Exp. No.	Experiment Details	Ref.	Marks
1	Download a case study of any failed project .Analyze project failures – State Reasons for failure -- Actions to be taken. Find Technical feasibility of the suggested actions or in other words state how would you implement those solutions	http://calleam.com/WTPF/?page_id=2338	5
2	Prepare RFP for a project containing Project Description, scope of work, Timeline & Budget, Requirements & deliverables, Technical information	3-PMBOK	5
3	Calculate MOV for your project: 1. Identify the value of IT project 2. Develop an appropriate metric 3. Set the time frame for achieving the <u>MOV</u> 4. Identify alternatives 5. Identify risk - choose the alternative with low risk	1-Chapter 2	5

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

4	Create Task set for each phase and mark critical path view Gantt Chart and Network Diagram Fill actual start and actual finish for completed task	2	5
5	calculate the Earned Value for a project that has a Project Plan and the actual task completion duration and cost	2	5
6	Create a team in JIRA -log issues, mention criticality. Sort issues in terms - its critically. List unresolved issues along with timestamp. Measure cycle time. Create reports	Tutorialpoint (OR) http://www.guru99.com/jira-tutorial-a-complete-guide-for-beginners.html	5
7	Extend your B.E. project. 1. List features – Extended scope 2. Identify components. Write technical specification 3. Decide which of the components to make/outsource/buy 4. Justify your answer. Make suitable assumptions. 5. Present it in the form of the Table (Component_id, Description, Required_Resources, Make/Outsource/Buy, Justification) 6. For the components you plan to buy write the criteria for evaluation. Do create a comparative statement. 7. Prepare sample SLA for the components you plan to outsource	https://www.pmi.org/learning/tools-templates	5
8	Examine the problem statement and answer the question: Should the Company submit a bid, and if so, what should they bid per computer?	2	5

				Practical	Oral			
40		-		20		60		

Pre-requisite Course Codes	ITC704 (Wireless Technology)	
After successful completion of the course, student will be able to:		
Course Outcomes	CO1	Understand the characteristics/ fundamentals of Wireless communication Channel
	CO2	Understand various new trends in wireless communication and their technologies
	CO3	Understand various protocols and topologies used in new wireless communication technologies.
	CO4	Understand the need of security and economics in wireless system

Exp. No.	Experiment Details	Ref.	Marks
1	Installation of NS2 on ubuntu12.04.	1,2	5
2	To understand the cellular frequency reuse concept fulfilling the following objectives: a. Finding the co-channel cells for a particular cell. b. Finding the cell clusters within certain geographic area.	1,2	5
3	To study logical and traffic channels of GSM.	1,2	5
4	To simulate a simple wireless communication between two mobile nodes and one static node using TCP connection and using services of FTP for data transfer.	1,2	5
5	To study and use different transmission ranges in wireless scenario in NS2.	1,2	5
6	Case study on security issues in wireless networks. Following are the objectives: a. Need of security in wireless networks b. Various attacks on wireless networks c. Security measures and protocols used for security.	4	5
7	To investigate MAC contention window for Wireless Network in NS2.	3,4	5
8	To study X-graph for time and congestion window for a TCP communication in NS2.	1,2	5

Pre-requisite Course Codes	
After successful completion of the course, student will be able to:	
Course Outcomes	CO1 Identify key challenges in managing information and analyze different storage networking technologies
	CO2 Illustrate the different component of storage network architecture.
	CO3 Describe the components and the implementation of NAS and storage virtualization
	CO4 Recognize the need of Backup to recover Information
	CO5 Use the concepts information retrieval in storage network.

Module No.	Topics	Ref.	Hrs.
1	NEEDFORSTORAGENETWORK INTRODUCTION:-Limitations of traditional server centric architecture, Storage centric architecture and its advantages. BASICS OFSTORAGENETWORK:-Intelligent Storage Systems (ISS),Data protection (RAID implementation methods).RAID arrays ,Components, RAID technologies, RAID levels, RAID impact on disk, performance &RAID comparison.	1,2	10
2	STORAGE NETWORK ARCHITECTURE SCSI,SAN:FC SAN FC Protocol Stack, IP Storage, Infini band, Virtual Interfaces.	1,2	08
3	ADVANCED STORAGE TECHNOLOGY NETWORK ATTACHED STORAGE (NAS):-Local File systems, Network File systems and file servers, Shared Disk File systems: Case study, Comparison:NAS,FC SAN and I SC SISOAN. STORAGEVIRTUALIZATION:- Virtualization in I/O path, Limitations and requirements, Definition of Storage Virtualization, Storage virtualization on Block and file level, Storage virtualization on	1,2	14

		Examination Scheme						
		ISE		MSE		ESE		
		10	30	100 (60% Weightage)				

Pre-requisite Course Codes	
After successful completion of the course, student will be able to:	
Course Outcomes	CO1 Summarize the architecture of wireless sensor networks.
	CO2 Identify applications of wireless sensor networks.
	CO3 Discuss the challenges in designing MAC and routing protocols for wireless sensor networks.
	CO4 Compare different operating systems and its performance issues.
	CO5 Summarize WSN standards and future trends in WSN.

Module No.	Topics	Ref.	Hrs.
1	Overview and Introduction of Wireless Sensor Network Background of Sensor Network Technology; Types of Application; Challenges for WSNs: Characteristics requirements, Required mechanism; Basic Sensor Network Architectural Elements; Sensor Network scenarios: Types of sources and sinks, single-hop versus multi hop networks, Multiple sinks and sources, three types of mobility; Some examples of sensor nodes: Mica Mote family, EYES nodes, BT nodes.	1,3	06
2	Applications of Wireless Sensor Network Category1(C1WSNs), Category2(C2WSNs), Range of Applications, Examples of Category1 WSN (C1WSNs) Applications and Examples of Category 2WSN(C2WSNs) Applications.	1,3	04
3	MAC Protocols Fundamentals of(wireless) MAC protocols, Requirements and design considerations for MAC Protocols in WSN, Low duty cycle protocols and wakeup concepts, STEM,S-MAC, Mediation device protocol, Wakeup radio concepts, Contention-based protocols, CSMA protocols, PAMAS, Schedule-based protocols, LEACH, SMACS, Traffic-adaptive medium access protocol(TRAMA),IEEE 802.15.4 MAC protocol, Slotted CSMA-CA protocol.	2	09
4	Network and Transport layer Protocol	2,4	07

After successful completion of the course, student will be able to:	
Course Outcomes	CO1 Identify the reasons for bugs & analyze the principles in software testing to prevent & remove bugs.
	CO2 Implement various test processes for quality improvement.
	CO3 Apply the software testing techniques in commercial environments.
	CO4 Describing the variety of ways to test software and indicate the trade-offs between various testing techniques.
	CO5 Identify the open source testing tools.

Module No.	Topics	Ref.	Hrs.
1	Testing Methodology Introduction, Goals of Software Testing, Software Testing Definitions, Model for Software Testing, Effective Software Testing vs Exhaustive Software Testing, Software Failure Case Studies, Software Testing Terminology, Software Testing Life Cycle (STLC), Software Testing methodology, Verification and Validation, Verification requirements, Verification of high level design, Verification of low level design, validation.	1,2	10
2	Testing Techniques Dynamic Testing: Black Box testing: boundary value analysis, equivalence class testing, state table based testing, cause-effect graphing based testing, error guessing. White box Testing Techniques: need, logic coverage criteria, basis path testing, graph matrices, loop testing, data flow testing, mutation testing. Static Testing. Validation Activities: Unit validation, Integration, Function, System, Acceptance Testing.	1,2	12

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

	Regression Testing: Progressive vs. Regressive, regression testing produces quality software, regression testability, objectives of regression testing, regression testing types, Define problem, regression testing techniques.		
3	Managing the Test Process Test Management: test organization structure and of testing group, test planning, detailed test design and test specification. Software Metrics: need, definition and classification of software matrices. Testing Metrics for Monitoring and Controlling the Testing Process: attributes and corresponding matrices, estimation model for testing effort, architectural design, information flow matrix used for testing, function point and test point analysis. Efficient Test Suite Management: minimizing the test suite and its benefits, test suite minimization problem, test suite prioritization its type, techniques and measuring effectiveness.	1,2	10
4	Test Automation Automation and Testing Tools: need, categorization, selection and cost in testing tool, guide lines for testing tools. Study of testing tools: Win Runner, QTP, Road Runner, Test Director and IBM Rational Functional Tester, Selenium etc.	3,5	08
5	Testing for Specialized Environment Testing Object Oriented Software: OOT basics, Object-oriented testing. Testing Web based Systems: Web based system, web technology evaluation, traditional software and web based software, challenges in testing for web based software, testing web based testing, Testing a data warehouse.	3,5	05
6	Quality management Software Quality Management, McCall's quality factors and Criteria, ISO 9126 quality characteristics, ISO9000:2000, software quality management	3	03
	Total hours of instructions		48

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
ITL801	Image Processing	--	--	2	--	--	1	1
		Examination Scheme						
		ISE		ESE		Total		
		40		Practical	Oral	60		
		-		20				

Pre-requisite Course Codes	ITC801 (Image processing)		
After successful completion of the course, student will be able to:			
	CO1	Implement Storage Provisioning using Logical Volume Number	
	CO2	Implement Storage Area Network using Sim SAN and Samba Server	
	CO3	Summarize the concept of Storage Network Backup and Recovery	
	CO4	Implement Information retrieval.	

Exp. No.	Experiment Details	Ref.	Marks
1	Implementation of Logical Volume Number	1,2	5
2	Implementation of software RAID	1,2	5
3	Implementation of SAN on Samba Server	1,2	5
4	Installation of SimSAN tool and Launch SimSAN agent, Engine and the Console.	1,2	5
5	Implementing SAN on SimSAN.	1,2	5
6	To Design data centre for an organisation	1,2	5
7	Case Study on Storage Network Backup and Recovery		5
8	Information retrieval using apache solr tool.	1,2	5
Total Marks			40

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned				
		L	T	P	L	T	P	Total	
ITL802	Big Data Analytics	--	--	2	--	--	1	1	
		Examination Scheme							Total
		ISE		ESE			20		
		40		Practical		Oral		60	

Pre-requisite Course Codes	IT34 (Object Oriented Programming) TEITC604 (Data Mining and Business Intelligence) ITC802(Big Data Analytics)	
After successful completion of the course, student will be able to:		
Course Outcomes	CO1	Demonstrate use of Map Reduce algorithms.
	CO2	Choose appropriate NO SQL Database in big data analytics.
	CO3	Apply map-reduce on Big data algorithms like Frequent Item set algorithm, Clustering, Data streaming algorithm.
	CO4	Make use of software tools like Pig, Hive, Hbase etc for big data analytics.
	CO5	Create an application of big data analytics like recommender systems, social media applications etc.

Exp. No.	Experiment Details	Ref.	Marks
1	Installation of Hadoop and execution of HDFS commands	1,2	5
2	Implementing simple algorithms in Map- Reduce on Hadoop	1,2	5
3	Installation of any No SQL database and solving any case study of Big data using it.	3	5

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

4	Demonstrate Matrix multiplication, Aggregates, joins, sorting, searching etc on Hadoop.	1,2	5
5	Make use of different software tools like Pig, Hive, Hbase etc for big data analytics.	1,2	5
6	Implementing any one Clustering algorithm using Map-Reduce	1,2	5
7	Implementing any one data streaming algorithm using Map-Reduce	1,2	5
8	Mini Project: One real life large data application to be implemented (Use standard Datasets available on the web) a) Twitter data analysis b) Fraud Detection c) Text Mining etc.	1,2,3	5
Total Marks			40

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned				
		L	T	P	L	T	P	Total	
ITL803	Computer Simulation and Modeling	--	--	2	--	--	1	1	
		Examination Scheme							Total
		ISE		ESE		Total			
				Practical	Oral				
		40	10	10	60				

Pre-requisite Course Codes	ITC803 (Computer Simulation and Modeling)	
After successful completion of the course, student will be able to:		
Course Outcomes	CO1	Explain system elements, data collection, model done from research paper
	CO2	Solve a queuing problem using Excel sheet, GPSS, Extend Sim
	CO3	Solve a inventory problem using Excel sheet, GPSS, Extend Sim
	CO4	Demonstrate the use of simulation on real world system as group project

Exp. No.	Experiment Details	Ref.	Marks
1	Identify from simulation research paper the following- Input, Decision parameter, output performance measures. Reference: paper published in wintersim.org	1	5
2	Bring out the statistics by solving a Single-server queue problem using Excel sheet	1	5
3	Bring out the statistics by solving a multi-server queue problem using Excel sheet	1	5
4	Solve to find the optimum inventory to order newspapers using Excel sheet	1	5
5	Bring out the statistics by solving a Single-server queue problem using GPSS	2	5
6	Bring out the statistics by solving an inventory problem using GPSS	2	5
7	Solve SSQ problem using ExtendSim	3	5
8	Solve Newspaper problem using Extend Sim	3	5
Total Marks			40

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned				
		L	T	P	L	T	P	Total	
ITL8041	Enterprise Resource Planning	--	--	2	--	--	1	1	
		Examination Scheme							
		ISE		ESE			Total		
			Practical		Oral				
		40	-		20	60			

Pre-requisite Course Codes	ITC8041 (Enterprise Resource Planning)	
After successful completion of the course, student will be able to:		
Course Outcomes	CO1	Relate with ERP related technologies
	CO2	Examine ERP development concepts and it's key modules
	CO3	Analyze the ERP implementation life cycle and the importance of its process in E-business
	CO4	Compare ERP tools and its business benefits.

Exp. No.	Experiment Description	Ref.	Marks
1	Select an ERP tool and review on it. Understand current system in use and do feasibility study to convert it in to ERP	1, 2	5
2	To design Business Process Models for Finance, HR, Purchases, manufacturing, Sales and distribution etc. Using DFD/UML diagrams. Business process modules should be prepared.		5
3	Suitable ERP S W should be selected based on needs of Enterprise. Pre Evaluation Screening Package Evaluation Project Planning Phase Discussion based on various implementation strategies and pros and cons of each strategy.	1, 2	5
4	Selection of Business organization for ERP Implementation. Enterprise can small, medium scale related production/retail/service/BPO or consultancy.	1, 2	5
5	Study of ERP Implemented Business Organization interference to ERP Implementation Life cycle	1, 2	5
6	Reporting tools for ERP	1,2	5
7	Design and Testing of unit modules and Integration of modules with realistic data	1, 2	5
8	Customization of an ERP tool for an organization	1, 2	5
	Total marks		40

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
ITL8045	Soft Computing	--	--	2	--	--	1	1
		Examination Scheme						
		ISE		ESE			Total	
				Practical	Oral			
40	-		20		60			

Pre-requisite Course Codes	ITC8045 (Soft Computing)	
After successful completion of the course, student will be able to:		
Course Outcomes	CO1	Design fuzzy logic control systems
	CO2	Apply supervised learning algorithms on various input patterns
	CO3	Apply unsupervised learning algorithms on various input patterns
	CO4	Design simple genetic algorithms for solving optimization problems
	CO5	Make use of available open source toolboxes for a particular soft computing technique

Exp. No.	Experiment Details	Ref.	Marks
1	To create a fuzzy library	2,3,4	5
2	To implement fuzzy membership functions.	2,3,4	5
3	To Design and implement Fuzzy Controller.	2,3,4	5
4	To implement Supervised Learning algorithm. (Single Discrete Perceptron Training Algorithm)	1,3	5
5	To implement Unsupervised Learning algorithm. (Winner take all Learning)	1,3	5
6	To implement Error Back-Propagation Training Algorithm	1,3	5
7	To solve an optimization problem using genetic algorithm	3,4	5
8	To use fuzzy toolbox/ ANN toolbox in Scilab for solving a given problem	1,2,3	5
Total Marks			40
