

Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
(Autonomous Institute Affiliated to University of Mumbai)

Master Of Computer Applications

Second Year MCA
(Sem. III and Sem. IV)
Effective from Academic Year 2020-21

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated)

SYMCA Scheme 2020-2021

SEM III						
Course Code	Course Name	Group	Teaching Scheme (Hrs/week)			Credits
			L	T	P	
MCA31	Core and Advanced Java	ICT	3	-	-	3
MCA32	Database Management System	ICT	3	-	-	3

SEM-III

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated)

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
MCA31	Core and Advanced Java	3		--	3		--	3
		Examination Scheme						
		ISE		MSE		ESE		Total
		20		20		60		100

Prerequisite Course codes	MCA11	
	Student will be able to	
Course Outcomes	CO1	To build programming using basic constructs such a data types, encapsulation, inheritance Polymorphism and Exception handling
	CO2	Analyze real world problem for Generic classes with database connection and file handling using JAVA concepts
	CO3	Develop Web Applications using JSP and servlets
	CO4	To develop application using EJB, Spring and Hibernate

Module No.	Unit No.	Topics	Ref	Hrs
1		Fundamentals of Java Programming	1,2	4
	1.1	Classes, Instance variables, Methods, Constructors, Access Specifiers, Abstract Classes and Wrapper Classes,		
	1.2	Autoboxing and Unboxing, Inheritance, Polymorphism		
	1.3	Method Overriding, Use of Static, final, super and this keyword		
2		Packages and Interfaces	1,2	4
	2.1	Package concept, Creating user defined package, Access control protection		
	2.2	Defining interface, Implementing interface.		
		Generics and Collections		
	2.3	Generics - Generic Class, Creating Generic Classes		
	2.4	Generic Methods, Bounded Type, Collections- Collections and Generics		
	2.5	Collection Classes-Links, Vector, Linked Lists, Maps, HashMap, Wild Cards Lambda Expressions - Lambda Type Inference		
3		Exception Handling	1,2	8
	3.1	Exception as objects, Exception hierarch		
	3.2	Exception Keywords - Try, catch, finally, throw, throws		
	3.3	Creating User defined Exceptions, Assertion, Annotations		
		Multithreading		
	3.5	Java thread model, Life Cycle of Thread		
	3.6	Working with Thread class and the Runnable interface, Thread priorities		
		File handling		
	3.7	Input streams and Output streams		
	3.8	FileInputStream and FileOutputStream, Binary and Character streams		
3.9	Buffered Reader/ Writer, Object serialization and Deserialization			
4		Database Programming	1, 2	8
	4.1	JDBC architecture, Types of drivers, Java.sql package		
	4.2	Establishing connectivity and working with connection interface		
	4.3	Working with statement interface, Working with PreparedStatement interface		
	4.4	Working with ResultSet interface, Working with ResultSetMetaData interface.		
5		Web development using Servlets		

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated)

	5.1	Introduction to servlets, Servlet vs CGI, Servlet API overview		
	5.2	Servlet Life cycle, Generic servlet, HTTPServlet, ServletConfig, ServletContext		
	5.3	Handling HTTP Request and response –GET /POST method, request dispatching, Using cookies, Session tracking.		
6		Web development using JSP	8	6
	6.1	JSP Architecture, JSP Directives, JSP scripting elements		
	6.2	Default objects in JSP, JSP Actions, JSP with beans and JSP with Database		
	6.3	Error handling in JSP, Session tracking techniques in JSP		
		Enterprise Java Beans		
	6.4	Introduction to Enterprise java beans, Types of EJB		
	6.5	Session bean , entity beans, Message driven beans		
7		Introduction to Spring Frameworks		
	7.1	Introduction to Spring Framework, Spring Architecture,	7	6
	7.2	Spring Aspect of Object Oriented Concepts – Join Point and Point Cuts.		
		Hibernate		
	7.3	ORM, Understanding different components of Hibernate How to persist objects using Hibernate, How to use mapping files, configuration files and Session object Instance states	6	
	7.4	Transactions in Hibernate Querying with HQL (Hibernate Query Language)		
	7.5	Named and native queries Working with Criteria Interface		
			42

MCA32	Database Management System	3	--	--	3	--	--	3
		Examination Scheme						
		ISE		MSE		ESE		Total
		20		20		60		100

Pre-requisite Course Codes	--
	Student will be able to
Course Outcomes	CO1 Design ER diagram and relational database.
	CO2 Apply normalization on given database.
	CO3 Analyze transaction and concurrency control mechanism.
	CO4 Understand storage and security mechanism.
	CO5 Illustrate emerging database systems.

Module	Unit No.	Topics	Ref.	Hrs.
1		Introduction to DBMS	1,2	4
	1.1	File system organization		
	1.2	Purpose of Database system		
	1.3	Data models		
	1.4	Codd's rules		
	1.5	DBMS architecture		
2		ER and Relational model	1,2	6
	2.1	Entity set & Relationship set		
	2.2	Mapping cardinalities		
	2.3	Designing of ER diagram		
	2.4	EER features		
	2.5	ER to Relational Model Designing		
3		Query optimization, Normalization and Functional Dependencies	1,2,3	9
	3.1	Query processing steps		
	3.2	Evaluation of Query		
	3.3	Relational Optimization		
	3.4	Functional dependency and its types		
	3.5	Normal forms : 1NF, 2NF, 3NF, BCNF		
4		Transaction Management, Concurrency Control Techniques, Database Recovery Techniques	1,2,3	9
	4.1	ACID properties		
	4.2	Transaction states		
	4.3	Serializability and its types		
	4.4	Recoverability		
	4.5	Concurrency control mechanism		
	4.6	Lock based protocol		
	4.7	Timestamp based protocol		
	4.8	Recovery Techniques based on Deferred and Immediate Update		

Sardar Patel Institute of Technology
Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated)

	4.9	Shadow paging and ARIES recovery algorithm		
5		Data storage and security	1,2,3	4
	5.1	File Organization		
	5.2	RAID levels		
	5.3	Introduction to database security		
	5.4	Discretionary and mandatory access control		
6		Emerging Database Systems	1,2,3	10
	6.1	Client/Server Model (Poor setup, Split database setup)		
	6.2	Distributed Databases (Overview, Types of Distributed databases, Data fragmentation replication and allocation techniques, Query processing and Concurrency control)		
	6.3	Object Based Databases (Overview, Complex data types, Inheritance in SQL, Object identity and Reference types in SQL)		
	6.4	XML (XML documents, Approaches to store XML documents, Extracting XML documents from Relational Database)		
	6.5	Mobile Databases (Overview, Types of Mobile Databases, Synchronization process)		
	6.6	Multimedia Databases (Multimedia architecture requirements, Distributed Multimedia system, Client Server system)		
Total				42

		20	20	60	100			

Pre-requisite Course Codes	MCA 25	
	Student will be able to	
Course Outcomes	CO1	Apply Operations research methodology to a broad range of problems in business and industry.
	CO2	Use mathematics and mathematical modelling using computers to forecast the implications of various choices.
	CO3	Solve optimization problems.
	CO4	Think of new methods for solving optimization problems.

Module No.	Unit No.	Topics	Ref.	Hrs.
1		Nature of Operation Research	1,2	1
	1.1	History ,Nature of Operation Research ,Impact of Operation Research, Application Areas		
2		Overview of Modeling Approach	1,2	2
	2.1	Formulating the problem, Constructing a mathematical model, Deriving a solution, Testing a model and the solution		
	2.2	Establishing control over the solution, Implementation issues		
3		Linear Programming	3,4,5	13
	3.1	Introduction ,Graphical solution, Graphical sensitivity analysis		
	3.2	The standard form of linear programming problems, Basic feasible solutions,		
	3.3	Simplex algorithm, Artificial variables		
	3.4	Big M and two phase method		
	3.5	Solution to Problems based on Degeneracy, Alternative optima, Unbounded solution, Infeasible solutions		
4		Dual Problem	6,7	5
	4.1	Relation between primal and dual problems		
	4.2	Dual simplex method, Sensitivity analysis		
5		Transportation Problem	3,6,7	6
	5.1	Starting solutions. North-west corner Rule – least cost methods		
	5.2	Vogel's approximation method, MODI Method		
	5.3	Minimization and Maximization problem		
6		Assignment Problem & Travelling Salesman Problem	4,8,10	5
	5.1	Assignment Problem: Hungarian method (Minimization and

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
MCA34	Soft Skill Development	3	1	--	3	1	--	4
		Examination Scheme						
		ISE I		MSE		ISE II		Attendance
		35		20		35		10

Pre-requisite Course Codes	--	
	Student will be able to	
Course Outcomes	CO1	Develop skills in communication, business correspondence, presentations, group discussions and interviews
	CO2	Apply valuable strategies and interpersonal skills thereby making themselves more productive and better capable to lead others
	CO3	Understand the importance of teamwork and learn to perform to the best of their ability, both individually and as team players

Module No.	Unit No.	Topics	Ref.	Hrs.
1		Soft-Skills Introduction	1,2,4	02
	1.1	What are Soft Skills? Significance of Soft-Skills – Soft-Skills Vs. Hard Skills - Selling Soft- Skills –		
	1.2	Components of Soft Skills – Identifying and Exhibiting Soft-Skills		
2		Communication	1,2,5	08
	2.1	Concept and meaning of communication, methods of communication		
	2.2	verbal and non-verbal communication, barriers to communication, techniques to improve communication.		
	2.3	Communication in a business organization: Internal (Upward, Downward, Horizontal, Grapevine). External Communication		
	2.4	7 C's of communication. Active Listening, Differences between Listening and Hearing, Critical Listening, Barriersto Active Listening, Improving Listening Practical (Role plays, case studies)		
3		Written Communication:	1,2,3	08
	3.1	Principles of Correspondence, language and style in official letter (full block format, modified block format), Business letters (enquiry to complaints and redressal), Applicationletter, CV writing, , E-mail etiquette,		
	3.2	Documentation of Meetings, Notice, Agenda		
	3.3	Practical (Practice on CV, Business Letters, Applications, Notice, Agenda, Minutes of Meetings)		
4		Presentation techniques	6,7	12
	4.1	Planning the presentation, Structure of presentation, Preparation, Evidence and Research, Delivering the presentation, handling questions, Time management. Visual aids. Practical - Presentation by students in groups of maximum 3 on Organizational Behavior topics allocated by faculty.		

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated)

	4.2	Topics have to cover – Personality: Meaning, Personality Determinants, Traits, Personality types and its, impact on career growth, Personality and Values, Perception and Individual Decision Making. Diversity in Organizations		
	4.3	Attitude: Meaning, Components of Attitude, changing attitude and its impact on career growth Motivation Goal setting: SMART (Specific, Measurable, Attainable, Realistic, Timely) Goals, personal and professional goals		
	4.4	Time Management. Learning in a group, Understanding Work Teams, Dynamics of Group Behavior, Techniques for effective participation Leadership Emotional intelligence		
5		Public Speaking	6,7	08
	5.1	Selecting the topic for public speaking, Understanding the audience, Organizing the main ideas, Language and Style choice in the speech, Delivering the speech Practical (Extempore)		
6		Group Discussion Skills	6,7	08
	6.1	Evaluation components, Do's and Don'ts. Practical (Group Discussions)		
7		Interview Techniques	6,7	08
	7.1	Pre-Interview Preparation, Conduct during, interview, Verbal and non-verbal communication, common mistakes. Practical (Role plays, mock interviews)		
			Total	42

		20	20	60	100			

Pre-requisite Course Codes	MCA23	
	Student will be able to	
Course Outcomes	CO1	Understand basic architectures of AI intelligent agents.
	CO2	Apply appropriate method and knowledge representation technique to solve problem.
	CO3	Analyze the problem using logic, inferences and probabilistic reasoning model with uncertainty
	CO4	Apply planning techniques to solve domain problems.
	CO5	Design the AI applications in real world scenario.

Module	Unit No.	Topics	Ref.	Hrs.
1		Introduction to AI	1,3	5
	1.1	Introduction to Artificial Intelligence, Computational Intelligence.		
	1.2	AI: Applications, Features, Limitations.		
	1.3	Intelligent Agent: Agent, specify the task environment using PEAS		
	1.3	Properties of task environments		
	1.5	The structure of agents and their architecture		
2		Problem Solving	1,2	13
	2.1	Problem solving agents, toy problems, real world problems, state space search		
	2.2	Uninformed Search Methods: Comparison of Breadth First Search and Depth First Search, Depth Limited Search, Depth First Iterative Deepening (DFID)		
	2.3	Heuristic Search Methods: Heuristic functions, Best First Search, Hill Climbing, Local Maxima, Beam search		
	2.4	Randomized Search and Emergent Systems: Iterated Hill Climbing, Simulated Annealing, Genetic algorithms, Travelling salesman problem, Emergent systems, Ant colony optimization.		
	2.5	Finding Optimal Path: Branch & bound, A* search, Admissibility of A*, Iterative deepening A*, Recursive best first search, AND-OR graph, AO* search.		
	2.6	Game Playing: Game trees, Optimal strategies, The minimax algorithm, Alpha-Beta Pruning, SSS* example.		
3		Knowledge Representation	1,2,4	3
	3.1	Semantic networks, Description logics		
	3.2	Circumscription and default logic, Truth maintenance systems.		
	3.3	The internet shopping world		
	3.4	Rete Network		
4		Logic and Inferences	1,2,4	6
	4.1	The Propositional logic, First Order Logic: Syntax and Semantic, FOL rules, Inference in FOL		
	4.2	Forward chaining, backward Chaining		
	4.3	Resolution refutation in FOL, deductive retrieval, handling equality

Pre-requisite Course Codes :	MCA11, MCA31 , MCA32, MCAL36	
	Student will be able to	
Course Outcomes	CO1	Formulate a real world problem and develop its requirements.
	CO2	Develop a design solution for the identified requirements.
	CO3	Test the prototype against identified requirements.
	CO4	Develop effective communication skills for presentation of project related activities.

Guidelines

1. Project assessment is done by internal and external examiner. The project carries weightage of 50 marks.
2. The internal assessment is done in two phases. Phase I carry 10 marks, Phase II carries 15 marks. Students will be continuously assessed by the internal examiner in the middle of the semester (phase I) and at the end of the semester (phase II).
3. The external examiner will be evaluating the students for 25 marks at the end of the semester.
4. ESE for project shall carry maximum 50 marks in each semester. These 50 marks shall be given by the internal and external examiner together.

	CO2 Apply static and dynamic software testing techniques to find bugs in software.
	CO3 Make use of test management and automation to improve test strategy.
	CO4 Apply various Software Quality Assurance Techniques to ensure the quality in software.

Module No.	Unit No.	Topics	Ref	Hrs
1		Basics of Software Testing	1,3	4
	1.1	Humans, Errors & Testing, correctness vs reliability, Goals of software testing, model for software testing, Life cycle of bugs		
	1.2	Testing & Debugging, Principles of testing, Software testing methodology.		
2		Testing in the Software Life Cycle & Test Levels	1,2	6
	2.1	The General V-Model, Software Testing Life Cycle (STLC), Verification and Validation activities.		
	2.2	Component Test, Integration, Test, System Test, Acceptance Test, Generic types of Testing-Functional, Non Functional		
	2.3	Testing software structure, Regression Testing		
3		Static Testing	2	3
	3.1	Structured Group Examinations – Reviews, General process, Roles and responsibilities, types of reviews, selection criteria. The compiler as a static analysis tool.		
4		Dynamic Testing	1,2	8
	4.1	Black Box Testing- Equivalence Class Partitioning, Boundary Value Analysis,		
	4.2	State Transition Test, Cause Effect Graphing and Decision Table Technique		
	4.3	White Box-Logic Coverage criteria, Control flow testing, Data flow testing. Mutation Testing.		
5		Test Management	1,2	6
	5.1	Test organization, Test Planning, Test plan hierarchy		
	5.2	Detailed test design and test specifications.		
	5.3	Incident Management – Test Log, Incident Reporting, Classification, Status		
6		Test automation	1	3
	6.1	Need for automation, Categorization of testing tools, Selection of testing tools,		
	6.2	Costs incurred in testing tools, Guidelines for automated testing,		
	6.3	Overview of some commercial testing tools		
7		Software Quality Assurance	1,4	6
	7.1	QA v/s QC, Quality assurance during SDLC phases, Quality Management System (QMS)- Benefits, attributes.		
	7.2	Contents of the Software Quality Assurance Plan, SQA: Organization level initiatives, Defect prevention		
	7.3	Capability Maturity model		

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated)

8		Software Measurement & Metrics	4	6
	8.1	Measurement during Software Life Cycle Context		
	8.2	Defect Metrics, Metrics for software Maintenance & Requirements		
	8.3	Measurement Principles		
	8.4	Case study for Identifying Appropriate Measures & Metrics for Projects		
		Total		42

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
MCA43	Design and Analysis of Algorithms	3	--	--	3	--	--	3
		Examination Scheme						
		ISE		MSE		ESE		Total
		20		20		60		100

Pre-requisite Course Codes	MCA11, MCA 23
	Student will be able to
Course Outcomes	CO1 Analyze time and space complexity of different algorithms.
	CO2 Demonstrate the applicability of divide & conquer method
	CO3 Apply greedy and dynamic method to given problem.
	CO4 Evaluate backtracking and branch and bound techniques.
	CO5 Demonstrate graph and string matching algorithms.
	CO6 Compare P and NP problems

Module No.	Unit No.	Topics	Ref.	Hrs.
1		Introduction to analysis of algorithm	1,2	4
	1.1	The Role of Algorithms in Computing		
	1.2	Growth of Functions		
	1.3	The substitution method		
	1.4	Recursion tree method		
	1.5	Introduction to time complexity : worst case, best case, average case analysis, space complexity. Asymptotic notations (Big O, Omega, Theta)		
2		Divide and Conquer	1	6
	3.1	Binary Search analysis		
	3.2	Merge sort analysis		
	3.3	Quick sort analysis		
	3.4	Matrix multiplication		
3		Greedy Method & Dynamic Programming	3,2	6
	4.1	Introduction to Greedy method		
	4.2	Knapsack problem		
	4.3	Minimum cost spanning tree- kruskal and prims algorithm		
	4.4	Introduction to Dynamic programming		
	4.5	0/1 Knapsack problem		
	4.6	Matrix Chain Multiplication		
	4.7	Longest Common Subsequence		
	4.8	Optimal Binary Search Tree		
4		Backtracking	1	5
	5.1	Introduction to Backtracking method		

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated)

	5.2	8 queen problem		
	5.3	Graph coloring		
	5.4	Hamiltonian cycles		
	5.5	The subset sum problem		
5		Branch and Bound	1	4
	6.1	Introduction to Branch and bound technique.		
	6.2	Bounding and FIFO branch and bound		
	6.3	Least Cost search branch and bound .		
	6.4	15 puzzle problem		
	6.5	Travelling salesman problem		
6		Graph algorithm	1,2	6
	7.1	Single source shortest path- Dijkstra's algorithm, Bellman Ford Algorithm		
	7.2	All pair shortest path-Floyd Warshall algorithm, Johnson's Algorithm		
	7.3	Max Flow Algorithm: Ford-Fulkerson method, Maximum Bipartite Matching, Push-relabel algorithm		
7		String Matching Algorithm	3	6
	8.1	Brute Force String matching		
	8.2	Rabin Carp string matching		
	8.3	Knuth-Morris-Pratt algorithm		
	8.4	String Matching with Finite Automata		
8		Approximation Algorithm	3	5
	2.1	P and NP complete problem. P and NP hard problem.		
	2.2	The Vertex-Cover Problem		
	2.3	The set-covering Problem		
			Total	42

		20	20	60	100			

Pre-requisite Course Codes	MCA 12, MCA 22
	Student will be able to
Course Outcomes	CO1 Understand HMI as basic for UX Design
	CO2 Explain UX design life cycle
	CO3 Analyze UX design process for users
	CO4 Analyze various parameters for design process.
	CO5 Evaluate UX design process
	CO6 Understand UX design for Agile development

Module No.	Unit No.	Topics	Ref.	Hrs.
1		Introduction to Human Machine Interaction	6,8	3
	1.1	Introduction		
	1.2	History of User interface designing		
	1.3	Usability		
	1.4	GUI & Web		
	1.5	User interface Design Goals		
2		UX Design and Life Cycle	1,2	6
	2.1	What is UX (User Experience), Ubiquitous interaction		

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated)

	2.2	A UX process lifecycle template		
	2.3	The system complexity space		
	2.4	Meet the user interface team		
3		The UX Design Process – Understand Users	1	7
	3.1	Introduction		
	3.2	The system concept statement		
	3.3	Contextual analysis-Introduction, User work activity gathering		
	3.4	Creating and managing work activity notes		
	3.5	Constructing your WAAD(Work Activity Affinity Diagram)		
	3.6	Formal Requirements Extraction		
	3.7	Abridged method for requirement extraction		
	3.8	User Model (Social Model), Usage Model (Flow Model, Task Interaction Model), Work Environment Model.		
4		The UX Design Process-thinking, ideation and sketching	1,3	9
	4.1	Design thinking		
	4.2	Design perspective		
	4.3	User personas, Ideation, Sketching		
	4.4	Mental models		
	4.5	Conceptual model		
	4.6	Storyboards		
	4.7	Wireframes		
5		The UX Design Process- Prototyping and Evaluation	1,3	9
	5.1	Fidelity of prototype		
	5.2	To make effective paper prototype		

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated)

	5.3	UX Evaluation and Improve UX Goals, Metrics and Targets		
	5.4	UX Evaluation Techniques.- Formative vs Summative		
	5.5	Types of formative and informal summative evaluation methods		
	5.6	Types of evaluation data		
	5.7	Practical Approach to UX Inspection		
6		UX methods for Agile Development	1,2	8
	6.1	Introduction		
	6.2	Basics of agile SE method		
	6.3	drawbacks of agile SE method from the UX perspective		
	6.4	A synthesized approach to integrate UX		
	6.5	Four Kinds of Affordance in UX Design		
			Total	42

		20	20		60			

Pre-requisite Course Codes		MCA25,MCAL26
		Student will be able to
Course Outcomes	CO1	Understand the basics of NLP and text processing.
	CO2	Apply mathematical techniques that are required to develop NLP applications.
	CO3	Analyze various NLP algorithms.
	CO4	Analyze the text mining NLP applications.

Module	Unit No.	Topics	Ref.	Hrs.
1	1.1	NLP Introduction and Basic Text Processing: NLP Basics, Empirical laws, Text processing basics.	1,2	7
	1.2	Spelling Correction, Language Modeling: Spelling correction edit distance, Weighted edit distance and other variations, Noisy Channel model for spelling correction, N-gram language models, Evaluation of language models, Basic smoothing.		
2	2.1	Advanced smoothing for language modeling, POS tagging: Advanced smoothing models, Computational morphology, finite-state methods for morphology, POS tagging, Hidden Markov models for POS tagging.	1,2	7
	2.2	Models for Sequential tagging – MaxEnt, CRF: Viterbi decoding for HMM, Parameter learning, Baum Welch algorithm, Maximum Entropy, conditional random fields.		
3	3.1	Syntax – Constituency Parsing: Syntax introduction, Syntax parsing, Syntax – CKY, PCFGs, PCFGs – Inside-Outside probabilities.	1,2	7
	3.2	Dependency Parsing: Dependency grammars and parsing introduction, Transition based Parsing: formulation, Learning, MST-Based Dependency parsing, learning.		
4	4.1	Distributional Semantics: Distributional Semantics introduction, Distributional models of semantics, Distributional Semantics- applications, structured model, Word embeddings.	1,2	7
	4.2	Lexical Semantics: Lexical Semantics, Wordnet, Word sense disambiguation, Novel word sense detection.		
5	5.1	Topic Models: Introduction, Latent Dirichlet Allocation-formulation, Gibbs sampling for LDA and applications, LDA variants and applications,	1,2	7
	5.2	Entity Linking, Information Extraction: Entity linking, Information extraction, Relation extraction, Distant supervision		
6	6.1	Text Summarization, Text Classification: Text summarization- LEXRANK, Optimization based approaches for summarization, Summarization evaluation, Text classification.	1,2	7
	6.2	Sentiment Analysis and Opinion Mining: Sentiment Analysis introduction, Sentiment Analysis - Affective lexicons, Learning affective lexicons, Computing with affective lexicons, Aspect based sentiment analysis.

		20		20		60		100

Pre-requisite Course Codes	MCAL16	
	Student will be able to	
Course Outcomes	CO1	Understand and discuss fundamental concepts, advantages and limits of the semantic web
	CO2	Model and query domain knowledge as ontologies defined using standards such as RDF and OWL
	CO3	Apply the principles of ontological engineering to modelling exercises
	CO4	Understand the applications of semantic web to web services and Web 2.0

Module No.	Unit No.	Topics	Ref.	Hrs.
1		Introduction to the Semantic Web	1	4
	1.1	The revolution of semantic web, Evolution of web, Need for semantic web		
	1.2	Web 2.0 approach, semantic web approach, benefits of semantic web, Characteristics of SW, SW Vs AI, building blocks of SW		
2		Introduction to Ontologies	1	4
	2.1	Introduction, transfer from DB to ontology, difference between ontology and taxonomy		
	2.2	Types of ontology, why to develop ontology, Ontology development life cycle, advantages, limitation of ontology		
3		Ontology Languages for the Semantic Web	2	6
	3.1	Resource Description Framework (RDF) – Lightweight ontologies Introduction, RDF: Basic Ideas, RDF: XML-Based Syntax RDF Schema: Basic Ideas		
	3.2	RDF Schema: The Language RDF and RDF Schema in RDF Schema, An Axiomatic Semantics for RDF and RDF Schema A Direct Inference System for RDF and RDFS, Querying in SPARQL		
4		Web Ontology Language: OWL	2	6
	4.1	Introduction , OWL and RDF/RDFS , Three Sublanguages of OWL, Description of the OWL Language		
	4.2	Layering of OWL Examples, OWL in OWL ,Future Extensions 150		
5		Ontology Engineering	1, 2	6
	5.1	Introduction, Constructing Ontologies Manually, Reusing Existing Ontologies		
	5.2	Semiautomatic Ontology Acquisition, Ontology Mapping , On-To-Knowledge Semantic Web Architecture		
6		Logic and Inference: Rules	2	4
	6.1	Introduction, Example of Monotonic Rules: Family Relationships Monotonic Rules: Syntax , Monotonic Rules: Semantics		
	6.2	Description Logic Programs (DLP) , Semantic Web Rules Language (SWRL)		
	6.3	Nonmonotonic Rules: Motivation and Syntax , Example of Nonmonotonic Rules: Brokered Trade

Tutorial on Semantic Web

Tutorial No.	Tutorial Details	Hours
1	Study of Ontology development life cycle with real time example	2
2	Design of Resource Description Framework with query writing	2
3	Layering of OWL Examples	2
4	Constructing Ontologies Manually, Reusing Existing Ontologies	2
5	Example of Monotonic Rules and Non-monotonic Rules	2
6	Study of Architecture of web 2.0	2
7	Understanding of Applications of Semantic Web	2

Course Code	Course Name	Teaching Scheme (Hrs/week)			Credits Assigned			
		L	T	P	L	T	P	Total
MCAL41	Computational Intelligence – I Lab	--	--	4	--	--	2	2
		Examination Scheme						
		ISE		MSE		ESE		Total
		40		--		--		40

Pre-requisite Course Codes	Mathematics, Probability ,Programming languages - Java/C++	
After successful completion of the course, student will be able to		
Course Outcomes	CO 1	Understand the difference between learning and programming and explore practical applications of Neural Networks (NN).
	CO 2	To design Neural Networks
	CO 3	To analyze the applications which can use fuzzy logic
	CO 4	Understand the basics of genetic algorithm, use of GA operators and its applications.
	CO 5	Appreciate the importance of hybrid approach

Exp. No.	List of Experiments	Ref.	Marks
1	To design MP neuron for various problems	1,2, 5	5
2	To design Perceptron Neural network	1,2, 5	5
3	To design supervised NN model using BPN	1,2	5
4	Implement Union, Intersection, Complement and Difference operations on fuzzy sets.	1, 2,3,4, 5	5
5	To perform Union, Intersection and Complement operations To implement De-Morgan's Law.	4,5	5
6	To design fuzzy controller	4,5	5
7	Implementation of Simple Genetic Application	4,5	5
8	Color recipe prediction using ANFIS	2,3, 4, 5	5
Marks			40

		Examination Scheme						
		ISE		MSE		ESE		Total
		40		--		--		40

Pre-requisite Course Codes	MCA42
Course Outcomes	Student will be able to
	CO1 Apply automation testing tool for web based application.
	CO2 Apply bug tracking tool.
	CO3 Apply mobile testing tool
	CO4 Apply behavior testing tool and test management tool.

Exp. No.	Experiment Details	Ref.	Marks
1	Study of automation tool, run test cases and use Base URL to run test cases in different domains.	1	5
2	Selenium commands-selenese, Matching Text Patterns, Performance Testing Concepts :Load Testing, Stress Testing.	1	5
3	Web Driver Implicit & Explicit Wait, Cross Browser Testing, API Testing.	1	5
4	Apply of bug tracking tool.	2	5
5	Study of mobile apps testing tool.	3	5
6	Run test cases on mobile devices and emulators.	3	5
7	Apply behavior driven testing tool.	4	5
8	Study of test management tool.	1,3,4	5
Total Marks			40

Pre-requisite Course Codes	--	
	Student will be able to	
Course Outcomes	CO1	Understand basics of Ionic Native
	CO2	Design and Develop User Interface components using Ionic Native.
	CO3	Develop Application using file handling techniques and API
	CO4	Develop Mobile Applications with database connectivity.

Exp. No.	Experiment Details	Ref.	Marks
1	Introduction: understanding ionic native and installing the development environment.	1,2	5
2	Building app with ionic: understanding SASS[Syntactically awesome style sheet] and angular components, ionic serve and ionic view, ionic CLI.	1,2	5
3	To Implement UI(User Interface) components (Toggle, checkbox, Alert, Action Sheet, Floating action bar button)	1,2	5
4	To implement navigational components (Menus, Navigation, Tabs, etc.)	1,3	5
5	To implement files concept for read/write access to files	1,3	5
6	To implement ionic Native Plugins API	1,3	5
7	To implement HTTP (REST API request)	1,3	5
8	To implement Firebase/SQLite	1,3	5

MCA P41	Mini Project-IV	--	--	2	--	--	01	01
		Examination Scheme						
		ISE			ESE		Total	
		25			25		50	

Pre-requisite Course Codes :	MCA11 , MCA 23, MCA31, MCA32	
	Student will be able to	
Course Outcomes	CO1	Formulate a real world problem and develop its requirements.
	CO2	Develop a design solution for the identified requirements.
	CO3	Test the prototype against identified requirements.
	CO4	Develop effective communication skills for presentation of project related activities.

Guidelines

1. Project assessment is done by internal and external examiner. The project carries weightage of 50 marks.
2. The internal assessment is done in two phases. Phase I carry 10 marks, Phase II carries 15 marks. Students will be continuously assessed by the internal examiner in the middle of the semester (phase I) and at the end of the semester (phase II).
3. The external examiner will be evaluating the students for 25 marks at the end of the semester.
4. ESE for project shall carry maximum 50 marks in each semester. These 50 marks shall be given by the internal and external examiner together.
