| | | |
|----------------------------|-------------------------|---------------------------------------------------------------------|
| Pre-requisite Course Codes | MCA22 | |
| | Student will be able to | |
| Course Outcomes | CO1 | Apply principles and communication protocols to Distributed Systems |
| | CO2 | Apply clock synchronization and Distributed shared memory |
| | CO3 | Analyze Distributed file system and management |
| | CO4 | Illustrate the fundamentals of Cloud Computing and its security. |

| Module No. | Module name | Topics | Ref. | Hrs. |
|------------|---------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|------|
| 1 | Introduction to Distributed Computing | Basic concepts of distributed systems, Distributed computing models, Advantages of Distributed systems, Issues in designing distributed systems. | 1,3 | 3 |
| 2 | Communication | Basic concept Inter process communication, Issues in IPC , Remote Procedural Call (RPC) ,RPC model, Remote Method Invocation (RMI) | 1,3 | 6 |
| 3 | Synchronization | Clock Synchronization, Logical Clocks, Election Algorithms, Mutual Exclusion, Distributed Mutual Exclusion-Classification of mutual Exclusion Algorithm Non Token based Algorithms, Token Based Algorithms. | 1,3 | 6 |
| 4 | Distributed shared Memory | Fundamental concepts of DSM, Design and Implementation issues of DSM | 1,3 | 5 |
| 5 | Resource and Process Management | Task assignment approach, Load balancing approach, load sharing approach, Introduction to process management, process migration, Threads. | 1,3 | 6 |
| 6 | Distributed File System | File models, File Accessing models, File caching schemes, File sharing semantics, File replication. | 1,3,5 | 4 |
| 7 | Cloud Computing fundamentals | Fundamentals of Cloud computing, Key Characteristics of Cloud computing, Cloud Types: Private Cloud, Public cloud,Hybrid,Cloud as a service , Platform as a service, Infrastructure as a service, Software as a service, Introduction & benefit of Virtualization, Implementation Levels of Virtualization, Types,Full and para virtualization | 7,8 | 6 |

| | | ISE | | MSE | | ESE | | |
| | | 20 | | 20 | | 60 | | |

| Pre-requisite Course Codes | MCA41 | |
|----------------------------|-------------------------|---------------------------------------------------------------------------|
| | Student will be able to | |
| Course Outcomes | CO1 | Recognize the importance of data preparation in Machine Learning |
| | CO2 | Build statistical models for data and Carry out exploratory data analysis |
| | CO3 | Apply machine learning algorithms for predictive modelling |
| | CO4 | Apply machine learning algorithms to solve real world problems |
| | CO5 | Develop awareness of ethical dimensions of the profession of data science |

| Module No. | Module name | Topics | Ref no | No. of Hrs. |
|------------|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|-------------|
| 1 | Introduction | Introduction to data mining: data Design, data sources and clustering, Data quality problems, data preprocessing Introduction to data science: data science process, stages of a data science project | 3 | 7 |
| 2 | Statistical Inference | Populations and samples, understanding of statistics for data science, statistical modeling, fitting a model, data analysis | 4,5 | 3 |
| 3 | Introduction - Machine Learning | Machine learning algorithm I: The Learning Problem - Introduction; supervised, unsupervised, and reinforcement learning, Components of the learning problem, Linear regression. Hypothesis testing, Training versus Testing, Gradient Descent, Over fitting & Regularization ,Logistic Regression, K-fold cross validation | 4, 5 | 8 |
| | | Machine learning algorithm II : Classification Techniques: Decision tree, Random Forest, Naïve Bayes, SVM Clustering Techniques: K-means, C-means, KNN, Hierarchical | 1 | 9 |

| | CO2 | Develop a design solution for the identified requirements. |
| | CO3 | Test the prototype against identified requirements. |
| | CO4 | Develop effective communication skills for presentation of project related activities. |

Evaluation Scheme

1. Project assessment is done by internal and external examiner. The project carries weightage of 50 marks.
2. The internal assessment is done in two phases. Phase I carry 10 marks, Phase II carries 15 marks. Students will be continuously assessed by the internal examiner in the middle of the semester (phase I) and at the end of the semester (phase II).
3. The external examination is conducted to evaluate the students for 25 marks at the end of the semester.
4. ESE for project shall carry maximum 50 marks in each semester. These 50 marks shall be given by the internal and external examiner together.

| Course Outcomes | CO1 | Interact user forums to support community. |
| | CO2 | Practice charity more effectively |
| | CO3 | Test the prototype against identified requirements. |
| | CO4 | Analyze with the main components of 3P (presage-process-product) model of teaching and learning |

- In the TYMCA course, students will focus on subjects like programming , DBMS, Security etc to bridge the gap between intermediate and Technology education.
- Student need to select the online courses from specified website from time to time based on the domain of Programming, Networking, Software management, Database, AI, Graphics, UED and Testing, OS and so on.
- List of the courses will be specified by the dept before the start of the semester
- Students have to select the course get it sanctioned the course before the commencement of the semester.
- Students need to successfully complete the course with all required criteria of submission (Considering attendance, evaluation, submission of assignment, completion of examination) and submit the course completion certificate to the dept.
- Based on the completion certificate in the speculated time, student will be eligible for the credit of 4 points.

| | CO2 | Apply the software engineering principles to solve real life problems using modern tools, used in the organization |
| | CO3 | Apply the software project management processes to carry out the successful completion of project |
| | CO4 | Apply technical communication effectively in the organization |
| | CO5 | Use professional ethics in application development |
| | CO6 | Develop skills for working in the team and for life-long learning |

Guidelines:

1. Student need to select a company for internship, or can work under the guidance the internal mentor. If student is not selected to work in industry for internship project, internal mentor need to organize project in the college itself which may be in accordance with Academic rules of institute. Max. 3 students shall be allotted to one internal mentor in case student not getting industry internship.
2. Every student should submit joining letter along with their project proposal within 4 weeks of joining internship in company. Project proposal should include company information, External mentor information, project abstract and tool (tentatively) working.
3. After submission of project proposals, ISE shall be conducted.
4. MSE shall be conducted as per academic time table.
5. Student need to arrange for meeting between internal and external mentor for feedback and improving the industry interaction before ESE.
6. Every student shall make draft of project report and get it accessed by internal mentor. The Project report should contain an Introduction to Project, which should clearly explain the project scope in detail. Also, Data Dictionary, ERDs, File designs and a list of output reports should be included if required as per the project title and scope. The project Work should be of such a nature that it could prove useful or be relevant from the commercial/management angle. Every student should submit duly signed Project Report.
7. ESE shall be conducted after submission of Project Report

The evaluation of a student shall be based on his/her performance in ISE, MSE and ESE. The mode of

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

evaluation for ISE and MSE is Orals and Presentation. During evaluation faculty must follow the rubrics prepared for respective evaluation. Performance shall be continuously monitored and record of assessment shall be maintained in the prescribed pro-forma by course faculty and monitored by department Head. The marks and weightage is shown in the following Table.

Table: Marks and Weightage of Evaluation

| Evaluation | Oral | | Presentation | | Report | |
|------------|-------|-------------|--------------|-------------|--------|-------------|
| | Marks | % weightage | Marks | % weightage | Marks | % weightage |
| ISE | 15 | 100 | 10 | 100 | -- | -- |
| MSE | 15 | 100 | 10 | 100 | -- | -- |
| ESE | 25 | 100 | 25 | 100 | 50 | 100 |

| Pre-requisite Course Codes : Programming language, DBMS, UML | |
|--------------------------------------------------------------|--------------------------------------------------------------------|
| Course Outcomes | Student will be able to |
| | CO1 Analyze a topic in the area of research |
| | CO2 Identify problem to carry out research |
| | CO3 Explore and enhance research potential |
| | CO4 Compile research content for presentation of literature review |
| | CO5 Understand structure of research papers |

Guidelines of Internship - Seminar

Step 1: Review Process

1. Student shall submit list of papers and patents selected for review
2. Students shall submit review of literature which include content based on survey, comparison etc

Step 2 : Define problem and state proposed solution

1. Based on the literature review, students shall define problem he identified and wants to work on it.
2. Students should be able to define solution for the problems identified. Propose the Solution

Step 3: Submission of the INTRODUCTION AND BODY of the technical paper

1. Based on the above content students should be able to write introduction and body of technical paper

Step 4: Submission of conclusion

1. Students should submit conclusion on the above analysis

Step 5: Submission of complete paper

1. Students should conclude all the information in IEEE format
2. Students should submit the technical paper

Step 6: Submission of Final Drafted Paper

1. Students should include list of the conferences where the paper can be submitted
2. Final paper should be submitted in hard copy

The evaluation of a student shall be based on his/her performance in ESE. During evaluation faculty must follow the rubrics prepared for respective evaluation. Performance shall be continuously monitored and record of assessment shall be maintained in the prescribed pro-forma by course faculty and monitored by department Head.

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)
